

Desktop Whiteboard 04  Specification	①  - Writing board ②  - Open the box to store office supplies ③  - Fast wireless charge	③.1 Parameters <table><tr><td>Product</td><td>: Desktop Whiteboard</td></tr><tr><td>Model</td><td>: Desktop Whiteboard 04</td></tr><tr><td>Distance:</td><td>≤6mm</td></tr><tr><td>Input</td><td>: 12V/1.6A 9V/2A 5V/2A</td></tr><tr><td>Output</td><td>: max15W</td></tr></table> The parameters are from theoretical design, will be different due to different factors!e picture is only for reference, please refer to the real object. ③.2 Function overview Charging Distance:The normal distance between the induction coil inside the mobile phone and the internal induction coil of the wireless charger is usually no more than 6mm.To ensure effective charging, please avoid using thick phone cases. Matching phone dimension:In order to ensure a better charging efficiency, there must be sufficient overlap between the induction coil inside the phone and the induction coil inside the wireless charger. This product is suitable for wireless charging cell phones whose screen size is between 5.5 ~ 7.5 inches. - 2 -	Product	: Desktop Whiteboard	Model	: Desktop Whiteboard 04	Distance:	≤6mm	Input	: 12V/1.6A 9V/2A 5V/2A	Output	: max15W	③.3 Instructions Connect the USB with the charging port and apply power, insert the USB-C into the product input port, the wireless charger will be in standby mode.  - 3 -	- Place the phone on the wireless charger with the bottom of the phone aligned with the non-slip bump and roughly centered left and right. Then start wireless charging - When there are other metal foreign matters or the charging temperature is too high, the wireless charger will stop charging and turn to the protection mode ③.4 Warnings : - Make sure your phone supports wireless charging - Do not put metal/magnet/credit card on your phone or case, it will affect wireless charging or cause damage to your device. - Please do not use a case with a thickness of more than 0.097 inches, otherwise it will not charge. - Do not bump, disassemble, squeeze or put the product into fire. - Do not use the product under humid, high temperature, or corrosive conditions to avoid leakage in the circuit. - Do not spill water or other liquids on the product. - When charging, keep the distance between the implanted medical device (pacemaker, cochlear implant, etc.) and the wireless charger at least 20 cm to avoid potential interference with the medical device. - Do not allow children to use the product alone. - 4 -	FCC Warning This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.Any Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help. FCC RF exposure statement: -The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. -This equipment should be installed and operated with minimum distance between 20cm the radiator your body. - 5 -
