FCC statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. Operation in excess of these limits may cause harmful interference to radio communications. This equipment generates, uses, and can radiate radio frequency energy which, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. There is no guarantee that interference will not occur in a particular installation. This equipment has caused harmful interference to radio or television reception when it was not installed and used in accordance with the instructions. If you are experiencing this type of interference, you can try the following measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the receiver and the equipment.
- Connect the equipment into a circuit on a different electrical outlet.
- Consult the dealer or an experienced radio/television technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. If it does cause interference, you must stop using the equipment until it no longer causes interference.

Any changes or modifications not expressly approved by the party responsible for compliance may void the user's authority to operate the equipment.
