H. Weather (Turn on the weather, choose the city you want or automatic location, the band will show the located city's weather)

I. Physiological cycle reminder

(Notes: Please kindly note above functions are working based on activated and saved the related setup)

Frequently Asked Questions (FAQs)

1.Why does the smart bracelet automatically disconnect Bluetooth when the Android screen goes out?

1>Lock background APP. When the Da Fit process is cleared, the smart bracelet will be disconnected from the mobile phone.

2 >Set APP self-startup

3 > Unrestricted background operation. The Android mobile phone installed with APP intelligently restricts the background operation by default, and App should be set manually without any restriction.

2. Why cannot the smart bracelet receive message push?

1> Please confirm that you have turned on the switch for message push at the mobile phone client.

2 > Please 'confirm that messages can be displayed normally in the mobile phone notification bar. The message push on the smart bracelet is completed by reading the message from the mobile phone notification bar. The smart bracelet will not receive the message push if there is no message in the mobile phone notification bar. (You need to find notification settings in the mobile phone settings, and turn on the notification switch of WeChat, QQ, call, SMS and mobile phone client).

3 >Turn on the mobile phone --- Settings. Enter "Notification use right" on the top search box, re-open Da Fit.

3.Why can't take a hot bath with the smart bracelet?

Answer: the bath water has a relatively high temperature, and generates a lot of

vapor which is in the gas phase with small molecular radius and can easily infiltrate into the smart bracelet from the shell gap. When the temperature drops down, the vapor will condensate into liquid-phase droplets which will easily cause the short circuit inside the smart bracelet and damage the circuit board and then damage thesmart bracelet.

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolledenvironment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
