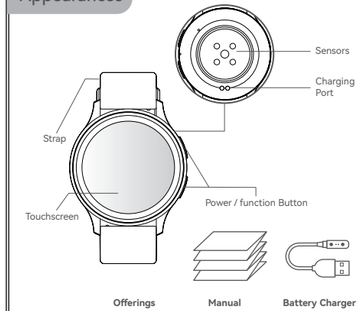
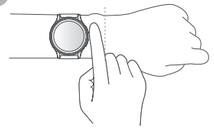
Appearances



*The schematic is a wireframe diagram for illustrative purposes only and is based on the actual object.

Wear

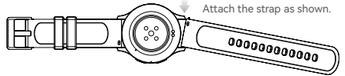


·For everyday use, wear the watch about one finger's length from the wrist and adjust the strap to the proper tension.

·It is recommended that the strap be adjusted tightly while exercising and then adjusted to its daily looseness after exercise.

*Too much slack can affect the sensor's ability to detect body parameters.

Removing & Installing the Strap



*Once assembled, pull gently to check if the assembly is successful.

Download & Matching

ApexWear mobile app is a necessary application to use the watch, you can download and bind the app to get a richer function experience.
The specific operation steps are as follows:

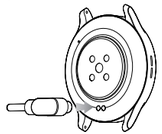
Charging Instructions

① Place the watch on the charging connector and fully fit the charger metal contacts to the watch charging metal patch.

② Please use a standard USB charging cable purchased through regular channels, a charger with an output voltage of 5V and an output current of 2A or less.

③ If the watch has been left on for too long and cannot be switched on, please connect the charger for one minute and the switch-on icon will be displayed for regular charging.

④ When charging, please wipe the metal contacts of the charging cable and the metal contacts on the back of the watch to avoid abnormal charging due to stains and moisture.



Aftermarket Service

Within 12 months from the date of purchase and acceptance of this product, if product quality problems occur and are confirmed to be caused by the product itself after appraisal by the East Apex after-sales service centre, you can enjoy the repair service.

RF exposure statement

This equipment complies with the FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

FCC Warning
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
