

FCC Labeling Requirement

The unit will have a permanently attached label on the top of the radio with the following statement:

The label will be placed directly on top of the radio "can". Material used is a 3.4mil thick, flexible, top-coated white vinyl label, a 0.9mil thick emulsion acrylic adhesive with an adhesive power of 3.4lb/in.

We will also include the following language in the User's Manual:

FCC ID: 2A3CJ-400102

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference and
- (2) This device must accept any interference received, including interference that may cause undesired operation.
