10, please put the product in a place where children can not reach.

Troubleshooting

In the event of a malfunction of the aromatherapy diffuser, please refer to the table below.	
Can't turn on the mist	● Is there enough or too much water in the tank? -Check the water level ● Is the power cord connected correctly? -Disconnect, check the power cord and connect carefully
No mist or unusual spray	● Not enough water or too much? -Add water to the tank, but don't fill it beyond the maximum water level. ●Is there dirt inside the ultrasonic nebuliser tank? Please refer to the maintenance instructions to clean the unit ●Is the air outlet too dirty? -Clean the air inlet section with a brush.
Product Leakage	●Low temperature or high humidity？ ---Under these conditions, the mist may condense quickly into water droplets, in which case please drain the machine from the back side and leave it upside down in a dry environment for 3 hours to air dry before use.
Buttons not working	●Check if there is any water overflow from the machine? -Find this situation, please immediately disconnect the power supply, pour out the water from the right back, and then inverted the machine in a dry environment to air-dry for 3 hours before use (note that during use the top cover must be covered to prevent the water spray into the internal machine and cause permanent damage)

Specifications

Product Name: Air Humidifier
Model:HYTC-080
Rated voltage:DC 24V
Rated current:650 mA
Rated power:15.6W
Material:ABS+PP
Water Tank Capacity:300ML (Spray continuously for about 6-8hours)
Product dimensions 260*138*130mm

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
