When connected to a mobile phone, double-click the multi-function button to turn on or off the mobile phone voice assistant function.

4.6MUTE THE MICROPHONE

When talking, turn the microphone mute switch to the mute mark position so that the other party cannot hear your own voice.

4.7CLEARING THE BLUETOOTH PAIRING LIST

When there is no connection, press and hold the "+ -" button for about 5 seconds until the red and blue lights are on for 2 seconds at the same time, the headset will automatically clear the Bluetooth pairing list and re-enter pairing mode.

4.8 LOW-POWER ALERT/AUTO-POWER OFF

When the Red indicator blinks and the voice prompts "LOW BATTERY" every 5 minutes till power off automatically, HT03 battery is low. Please charge it as soon as possible.
1. HT03 will be powered off automatically to save the battery life if not connected or disconnected with any devices over 10 minutes.
2. If the battery is lower than 3.1V, the item will power off automatically.

4.9CHARGING THE DEVICE

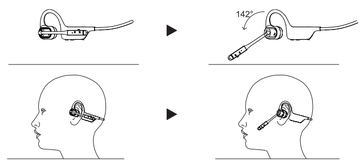
When the device is low on power or cannot be switched on, it can be charged by inputting DC 5V through the USB cable; the red light is on for a long time when charging; the blue light is on when the battery is full.
Note: The headset will automatically switch off when the charging cable is plugged in during the power on state.

5. CAUTION:

1. Please use a Type-C USB cable to connect a DC+5V adapter to power or charge the product to avoid abnormal working of the product.
2. Because the wireless signal of Bluetooth will be blocked and absorbed by surrounding objects, try to place it in an obstacle-free position from the Bluetooth connected device in use so that you can enjoy better quality music.

WEARING DIAGRAM

When a call is required, the microphone lever can be toggled in the direction shown to a position near the mouth.
When the microphone lever is not required, it can be toggled to a position next to the ear as shown.



ATTENTION

- Please wear the bone-conduction speakers of the headphones at your cheekbones before your ears and do not put them in your ears.
- Listening to music for an excessively long time may make you feel uncomfortable, please try to use a medium volume instead of a big one.
- No matter how the volume is, please do not make it prevent you from hearing the surrounding sounds. Please take care when using the headphones.
- Do not throw, press the headphones or put them in the water.
- The headphone should be kept away from fire, water and high-voltage devices.
- It is not for children's use as it contains small parts.
- Please do not treat it as domestic waste. Instead, send it to your electrical and electronic recycling station.If there is any injury or property loss due to violation of the above contents, we will not bear any responsibility.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user ’ s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
