TRUBLESHOOTING GUIDE

- Can I directly use Netflix on the projector?
* Yes, you can. The projector comes with preinstalled and officially licensed Netflix/YouTube/prime video apps. You have the convenience of watching your favorite videos directly on the projector without any hassle.
- The copyrighted contents from Hulu, Disney+ and similar services can not be mirrored or cast.
* Due to the copyright restriction from Hulu, Disney+, and similar services, the content MAY NOT be mirrored or cast. To play copyrighted content, please prepare a laptop, Fire TV Stick, Roku stick, or Chromecast™ and connect it to the projector.
- Blurry image
* Adjust the focus/keystone.
* The projector and screen/wall must be in the effective distance.
- Why doesn't the remote control work?
* Make sure the remote points at the IR receiver directly.
* Please make sure you have installed two AAA batteries in the remote control.
* Avoid mixing new batteries with old ones in the remote control as this can result in insufficient power supply and operational issues.
- Upside down images
* Go to **Homepage** > **Settings** > **Projection** to flip the projection image.
- Factory reset
* Go to **Homepage** > **Settings** > **Setup** > **Reset Default** to restore the projector to default settings.
- Can I sideload Android Apps onto the projector?
* Sorry, you cannot sideload Android apps onto the projector.

contact@projectorcs.com

- How to solve the black spot in the picture?
* It can be easily removed. Please scan the QR code on the back of the remote to get the video or contact us for a video to solve it.
- Auto Focus/Auto Keystone is not working.
* Please restore the projector to factory settings and try again. If the issue still persists, please send a video to our service team by email for assistance.
- The picture is not bright enough.
* To enjoy the best viewing experience, we suggest using it in a dark environment. The darker the room, the better the image.

IN THE BOX

contact@projectorcs.com

PRODUCT OVERVIEW

Notes:
* 2 AAA batteries (not provided) are required.
* Make sure the remote is directly pointed at the IR receiver.

contact@projectorcs.com

QUICK START

1. Projector Installation

contact@projectorcs.com

3. Setup Wizard

Follow the setup wizard to choose your preferred language, select the correct region, establish a WiFi connection, and access the homepage.

Tip:
To ensure successful Wi-Fi search, please select the correct region.

contact@projectorcs.com

4. Image Adjustment

1. Auto Focus

When the projector detects shaking/rapid movement, it will automatically adjust the image quality.

2. Electric/Manual Focus

You can also press the Focus buttons on the remote or go to **Homepage** > **Settings** > **Focus** > **Manual Focus** to sharpen the image focus until the blurry image becomes clear.

contact@projectorcs.com

Keystone Correction

Note:
Upon powering on the projector, it will automatically correct any keystone distortion within a range of vertical/horizontal $\pm 45^\circ$. A side projection at 20 degrees has virtually no impact on the resolution, while between 20 and 45 degrees, there may be a slight impact.

1. Auto Keystone Correction

When the projector detects shaking/rapid movement, it will automatically correct the keystone distortion.

contact@projectorcs.com

PROJECTOR CONNECTION AND INPUT SOURCE

Connect your device to the projector correctly, then select the right input source.

1. USB Connection

To play files stored on a USB disk, insert the disk into the projector. Then go to **Homepage** > **Inputs** > and select **USB** to play the desired file directly.

2. HD Connection

To connect a device with an HD output port to the projector, use the provided HD cable to connect it to the projector's HD input port. Then go to **Homepage** > **Inputs** > and select **HDMI/HDMI2**.

contact@projectorcs.com

Note:
For gaming, a wired HD connection is recommended due to faster processing and reduced audio-visual delays compared to wireless screen mirroring.

3. Wired Speaker and Headphones Connection

This option is not required to select any input source.

contact@projectorcs.com

WIFI CONNECTION

You can connect your projector to your router's WiFi by going to **Homepage** > **Settings** > **Network**.

SCREEN MIRRORING

Important Note:
Copyrighted content from Hulu, Disney+, or other similar streaming services CANNOT be wirelessly mirrored or cast due to copyright restrictions.

For Android System

To activate this function, please make sure your Android device supports Multi-screen/Smart View/Wireless Display. Names vary on different Android devices.

Step 1:
Go to the WiFi setting of your Android device to switch on the option of WiFi.

contact@projectorcs.com

Note:
It is not necessary to have a successful WiFi connection, but it is important to ensure that the WiFi is turned on in your Android device.

Step 2:
Go to **Homepage** > **My Apps** > **APP Assistant** to enter the interface below.

Step 3:
Activate the Multi-screen/Smart View/Wireless Display function on your Android device and search for the projector.
Step 4:
Choose **Projector** from the list, and once the connection is successful, the content on your Android device will be mirrored onto the projection screen or wall.

For iOS System

Step 1:
Connect the projector and your mobile device to the same router's WiFi.

contact@projectorcs.com

Note:
Copyrighted content from Hulu, Disney+, or other similar streaming services CANNOT be wirelessly mirrored or cast due to copyright restrictions.

Step 2:
Go to **Homepage** > **My Apps** > **APP Assistant**. Then, select **ScreenShare** and press OK on the remote to download and install the ScreenShare app.

Tip:
* You will need to download the ScreenShare app for the initial setup. Afterward, you can skip this step.
* After downloading the ScreenShare app, please reboot the projector to ensure the proper functioning of the app.

contact@projectorcs.com

Step 3:
Go back to the **My Apps** page, and then launch the **ScreenShare** app to enter the following page.

Step 4:
Go to the Control Center of your iOS device, then tap **Screen Mirroring**. After playing to search for the projector.

Step 5:
Choose **Projector** from the list, and once the connection is successful, the content on your iOS device will be mirrored onto the projection screen or wall.

contact@projectorcs.com

Home Share

Step 1:
Connect the projector and your mobile device to the same router's WiFi.

Step 2:
Go to **Homepage** > **My Apps** > **APP Assistant** and then select **HomeShare** to access the following page. Ensure the toggle is switched to On.

Step 3:
Launch a video player App on your mobile device and select a video to play.

Step 4:
Tap **ScreenShare** to search for the projector and select **Projector** to connect. The contents on your device will be cast to the wall/screen.

Tip:
When you cast a video from your mobile device, the video will only be displayed on the projected screen and you can still use your mobile device without interrupting the video or showing any of your other content.

contact@projectorcs.com

BT CONNECTION

1. Use as A BT Speaker

It is possible to use this projector as a BT speaker by connecting your mobile device to it through a BT connection.

Tip:
Ensure the projector's BT is enabled by going to **Homepage** > **Settings** > **BT**.

Step 1:
Go to **Homepage** > **My Apps** > **BT Speaker** to make the projector ready for a BT connection.

Step 2:
Access your mobile device's BT settings and activate BT. Search for **Projector** in the available devices list to pair your mobile device with the projector.

contact@projectorcs.com

2. Connect to An External BT Speaker

In addition to using the wired 3.5mm audio output port, you can also connect BT speakers or BT headphones to the projector via a BT connection.

Step 1:
Turn on your BT device and make it ready for a BT connection.

Step 2:
Go to **Homepage** > **Settings** > **BT** to scan available BT devices, then select your BT device and pair it with the projector.

contact@projectorcs.com

WARNING:
* Compared with the wired connection to a speaker, BT wireless connection spends more time processing digital audio data, converting said data to an audio signal, and streaming the signal. There may be a delay or slight lag on audio due to signal interference.
* As a result, the sound on the speaker may not be in sync with the image on the projector, especially when you are using wireless screen mirroring with WiFi and BT wireless connection at the same time.
* If you are experiencing this situation, please check the following options to improve audio quality:
* Instead of using wireless screen mirroring with WiFi and BT wireless connection at the same time, we recommend using wired screen mirroring and BT connection or using HD connection via the provided HD cable and BT connection simultaneously. If you still want to use wireless screen mirroring, it is recommended to output the audio via a wired speaker.
* Move your BT device closer to the projector.
* Keep the projector and your BT device away from other BT devices to avoid interference.
* You may be able to adjust the latency (Lip Sync) on your device which is playing the video. The way to adjust the latency varies with different devices; please consult it from the device manufacturer.
* Due to the compatibility issue between BT speakers/headphones and the projector, few BT devices may not be paired with the projector via BT wireless connection. Please contact us at support@wanliyo.com for further assistance.

contact@projectorcs.com

SETTINGS

Setup
1. Set the projector's language.
2. Adjust the date and time settings.
3. Set the screen to automatically activate screensaver after a specific period of inactivity.
4. Set the screen turn-off timer.
5. Set the screen to automatically turn off after a specific period of inactivity.
6. Update the software as needed.
7. Restore the projector to the factory settings.

Picture Mode
Select the picture mode and adjust the image preferences such as color temperature, contrast, etc.

Audio
1. Set your preferred sound style such as vivid, movie, etc.
2. Choose the correct digital output mode.
And more.

contact@projectorcs.com

BT

Connect the projector to an external BT speaker.

Network
Connect the projector to a working WiFi network.

Projection
Select the appropriate projection mode to ensure accurate image projection.

Keystone
1. Enable the projector to automatically correct the keystone after it is powered on.
2. Enable the projector to automatically correct the keystone after it is moved.
3. Enable the projected image to automatically match the screen.
4. Enable the projector to automatically avoid obstacles.
5. Correct the keystone manually.

Zoom
Modify the image size between 50% and 100%.

Focus
1. Enable the projector to automatically adjust the focus after it is powered on.
2. Enable the projector to automatically adjust the focus after it is moved.
3. Adjust the focus manually.

About
1. Check version info, license info, and device temperature.
2. Rename the projector.

FCC Statement
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation of the device.
The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. RCL REC 62471-5-2015

ISED Warning
This device complies with Industry Canada licence-exempt RSS standards. Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.
Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
(1) l'appareil ne doit pas produire de brouillage, et
(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
The device is compliance with RF exposure guidelines, users can obtain Canadian information on RF exposure and compliance. The minimum distance from body to use the device is 20cm.
L'appareil est conforme aux directives d'exposition aux RF, les utilisateurs peuvent obtenir des informations canadiennes sur l'exposition aux RF et la conformité. La distance minimale du corps pour utiliser l'appareil est de 20cm.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. Cet émetteur ne doit pas être colocalisé ou fonctionner en conjonction avec une autre antenne ou un autre émetteur.
Operation of this device in the band 5150-5250 MHz is restricted to indoor use only. Le fonctionnement de cet appareil dans la bande 5150-5250 MHz est limité à une utilisation en intérieur uniquement.
RG1 REC 62471-5-2015

RISK GROUP 2
Caution: Possibly hazardous optical radiation emitted from this product. Do not stare at operating lamp. May be harmful to the eyes.
