Green Light	Battery Level is Above 20%
Light out means fully charged	

When Not Charging	
Blinking Green Light	Sufficient Battery
Blinking Yellow Light	Charging Reminder
Blinking Red Light	Insufficient Battery

8.Features

- Utilizing the low-power worldwide GPS cellular network and Wi-Fi, the tracker can locate the precise location of your pet.
- The tracker not only prevents your pet from getting lost but also monitors the activities and health status.
- On the App,the tracker can display the pet's location and movement track in real-time. You can view the last 3 days' movement histories , which is updated daily.
- Set your own virtual boundaries in your yard/neighborhood. Completely wireless, compared with traditional hardwired fences, there is no need to dig, no wires, and no wiring-saving hundreds of dollars on installation. It promptly notifies you with an app alert if your pet escapes from the virtual boundary.
- IP67 weather and dust resistant.
- Long Battery Life -up to 15-30 days on a single charge in [Low Power Mode] and up to 7 days in [Normal Mode] When operating in [Tracking Mode], the device should be recharged promptly after daily use to maintain subsequent operations.

10.Caution

- Please review your owner's manual for safety and use instructions. Only use the original power source that came with this product. Improper use can result in serious injuries and / or damage to the product.
- Do not charge the tracker in wet situation.
- Keep the tracker away from heat sources.
- While our pet tracker Collars are designed for durability and daily wear, they may not be suitable for pets that tend to pull. We prioritize safety and encourage you to take reasonable precautions when determining the best fit for your pet. Never place the collar around your pet's neck that is too tight or too loose, and ensure your pet is supervised when using ROTY's pet tracking collars.
- Consumers who use our products acknowledge that Shenzhen Rontex Technology Co., Ltd shall not be liable or responsible for any loss or damage caused, directly or indirectly, by the products, information, or ideas contained in any of our marketing material, packaging, or website. In no event shall we be liable to you or any other party for incidental, punitive or consequential damages. It is the responsibility of the owner to comply with local safety standard when caring for pets.

11.Lithium Battery Warnings

- Misusing or mishandling a lithium battery may cause fire or explosion, which can result in personal injury and property damage. You must read the safety warnings and resources on using and / or handling batteries. Even if properly handled, lithium batteries may still catch fire or explode. Improper disposal/recycling of batteries or obsolete batteries Shenzhen Rontex Technology Co., Ltd of any responsibility for any damage these cells may cause.
- Keep lithium batteries away from metal objects. Do not store lithium batteries close to or on your person, in a pocket, purse, or bag with other metal objects, such as coins or keys.
- Lithium batteries must be properly disposed of, not in a fire or in the trash. Laws vary at the city, state and national level. It is the user's responsibility to dispose of lithium batteries properly. Many local governments and retail stores offer free recycling.
- Keep lithium batteries away from any heat source. Do not leave a battery inside a hot environment such as an automobile in the summertime.
- Immediately stop charging, storing or using lithium batteries if they emit and unusual odor, feel hot, change color or shape or appear abnormal.
- Avoid charging or storing lithium batteries at higher than 120°F (50°C). High temperatures might ignite the battery and cause a fire.
- Avoid charging lithium batteries below 32°F (0°C), as this will permanently reduce the battery capacity due to lithium plating.
- Do not charge lithium batteries overnight or without supervision.
- Keep lithium batteries away from Children.

Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operat

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body
