900-950	900-950	900-950	900-950	900-950	900
950-1000	950-1000	950-1000	950-1000	950-1000	950

Instructions

1. Install the blade holder

1. Pull to the right and push the blade holder switch.

2. According to the level of the blade, adjust the blade level.

3. Place the blade into the blade holder.

4. Pull to the left and push the blade holder switch.

Tip: The blade will gradually become dull when use, which affects the cutting quality. It is recommended to replace it in time.

IV Cutting film

1. Please prepare a protective film to be cut as shown in the picture to ensure that the protective film is flat and the film layer is complete without bending, folding or missing layers.

2. With automatic paper feeding: Push the protective film smoothly to the dotted area to let go.

3. After checking that the protective film is properly placed select the desired protective film model in the display screen of the film cutting machine or through Bluetooth in the APP interface, and click "start cutting" to cut.

4. After the cutting finished, the protective film will be automatically pointed out, take out the protective film, and complete the cutting.

VI The content of the manual will be revised irregularly according to product upgrades which may be different from the actual product. Please refer to the actual product. Please forgive us for any inconvenience caused!

Product parameters

control panel	24 TFT BOE IPS 240RGBX320 DOTS
Bluetooth	Bluetooth 5.0
Maximum cutting pressure	500g
Maximum feed width	200mm
Maximum cutting width	180mm
Cutting accuracy	0.1mm
Repeatability	0.05mm
power	48W
Power adapter	Input: AC100-240V, Output: DC24V 2.5A
size	305x173x137mm
weight	3.2kg

Notice

1. Avoid scratching your fingers

2. The working environment where the machine is placed must be clean and dry. Do not place the machine in a humid environment. Do not place the machine in a place with high temperature and high humidity. Do not place the machine in a place with strong magnetic field or strong electric field. Do not place the machine in a place with strong vibration or strong shock.

3. Do not use the machine for a long time. Please disconnect the machine power to prevent fire.

4. When you want to disconnect the power, please press the power button and wait for the power to be completely off. Do not touch the power button when the power is on.

5. Prohibited to use during thunderstorms to avoid being hit by lightning.

6. Prohibited unauthorized disassembly.

Warning: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:—Reorient or relocate the receiving antenna.—Increase the separation between the equipment and receiver.—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.—Consult the dealer or an experienced radio/TV technician for help. RF Exposure Statement: To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance of 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
