⚠ WARNING:
Not for children under 3 years!
Do not aim at eyes or face!
CHOKING HAZARD-Small parts!

BATTERY AND CHARGING SAFETY PRECAUTIONS

1. The product includes an internal battery that is factory-installed and non-replaceable.
2. Opening the product's housing could render the product inoperative and will void manufacturer warranties.
3. This toy is equipped with a lithium-ion battery. Never charge the battery unattended. Charge the battery in an isolated area. Keep away from flammable materials.
4. Do not expose the product to direct sunlight. There is a risk of the batteries overheating or igniting.
5. Do not disassemble, modify, heat, or short-circuit the batteries. Do not place them in fires or leave them in hot places.
6. Do not drop or subject the product to strong impacts.
7. Do not allow the batteries or the product to get wet.
8. Only charge the unit with the included and specified this product battery charger.
9. In the unlikely event of leakage or explosion, use a sand or chemical fire extinguisher for the battery.
10. Batteries must be recycled or disposed of properly.
11. Do not operate the product with a damaged cord or plug or after the product malfunctions or is dropped or damaged in any manner.
12. This product is not recommended for use outdoors.
13. Do not let the cord hang over the edge of a table or counter while the unit is charging.
14. Charging should be performed by an adult and out of reach of young children.
15. Lithium-ion batteries deteriorate, and their life span will shorten after repeated use. This is not a malfunction of the product.
16. The transformer, power supply or battery charger used with the electric toy shall be regularly examined for damage to the supply cord, plug, enclosure or other parts, and in the event of damage, it shall not be used until the damage has been repaired.

17. Misuse of transformer can cause electrical shock. The toy shall only be used with a transformer for toys or a power supply for toys. The toy shall be used with the transformer or power supply only if the transformer is supplied with the toy.

WARNING For the purposes of recharging the battery, only use the detachable supply unit provided with this toy.

BATTERY AND CHARGING

To begin charging the unit, make sure the unit is powered down, then connect the included charging adapter to the DC port on the back of the unit. The four green indicator lights will begin flashing, indicating that the unit is charging. Once the unit is fully charged, the lights will stop flashing and remain on. Disconnect the charger. You are ready to play!

NOTE: It can also be used while connected to the charger.

Batteries must be recycled or disposed of properly. When this product has reached the end of its useful life, it should not be disposed of with other household waste. The Waste Electrical and Electronic Equipment Regulations require it to be separately collected so that it can be treated using the best available recovery and recycling techniques.

TURNING ON THE PRODUCT

To turn on the device, rotate the main control knob to the right. After the main control knob switch is turned on, the fan will not run 15 degrees before the knob is turned on. Once turned on, the power display will remain green and the power distribution will be divided into four grids. The wind power level gradually increases with the wind force, and the fan speed is adjusted from level 1 to level 11. After use, turn the main control button to the left to turn off the device.

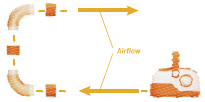
After turning on the device, Bluetooth is turned on and in a standby state. Bluetooth can connect to this phone to play music.
Bluetooth name: Air Tubes Toys-A

The volume knob controls the volume level (360 degree infinite speed adjustment). the speaker emits a prompt sound when the sound is adjusted to the maximum, and the volume can be directly turned off when it is adjusted to the minimum.

The machine enters a low-power shutdown state and displays a four panel flashing light prompt. It cannot be turned on again and displays a four panel flashing light prompt. Please charge it before use.

GETTING STARTED

To begin play, connect either a straight tube or corner tube to the fan unit's output. Continue using the connector rings to connect more tubes to create all kinds of loops, twists, and turns. There's no wrong way to build! Once your tube structure is built, turn on the fan unit, set the fan speed to the desired level, and then load the balls into the top opening/input of the fan unit, one at a time, to watch them fly through your creation.



START EXPLORING

Explore new arrangements and adjust the fan speed for a unique Air-Powered Fling experience every time.

Experiment further by incorporating the Funnel and Flare into your build to create another input, a spiral, a cone-mouth, a round mouth, The different parts have many different uses and arranging them differently can open up an entirely different world.

CLEANING

Do not submerge the main fan unit or accessories in water. Clean external rubber and plastic parts with a damp soft cloth and mild detergent. Wipe dry with a lint-free towel.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
