Universal wireless connection operation

1. Please put the wireless headset and mobile phone (or other connected devices) together;
2. Make sure the headset is powered on, open the charging box cover or remove the headset from the charging box, make sure that the left and right headsets are connected, the headset can enter the pairing mode;
3. Turn on the Wireless function of the user's mobile phone (or other Wireless device), and search or scan. At this time, the mobile phone will search for all nearby Wireless devices. Click the corresponding Wireless model name to connect. After successfully pairing and connecting, you can make a headset call, Listening to songs, etc.

Considerations when connecting wirelessly

1. Please control the distance between the wireless headset and the mobile phone (or other connected equipment) within 1 meter,the closer the better;
2. You can put the earphone in the charging box and open the charging box cover to connect;
3. When the headphones are removed from the charging box and connected, make sure that the left and right headphones are connected;
4. Do not close the charging box cover during the connection process;
5. The charging box needs to have enough power.If the headphones cannot be turned on when the cover is opened,put the headphones in the charging box,close the cover of the charging box and plug in the charger to charge for at least one hour;

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
