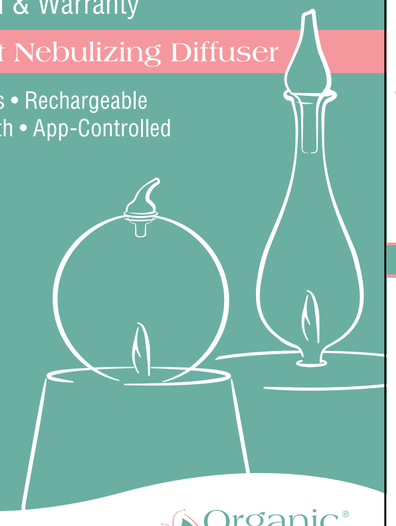
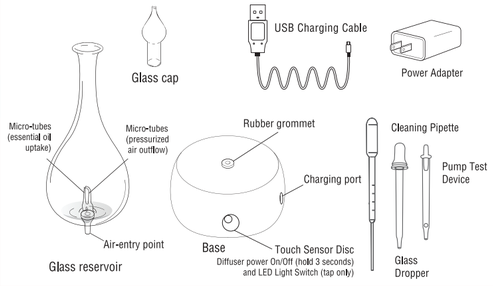
Smart Nebulizing Diffuser

Wireless • Rechargeable
Bluetooth • App-Controlled



Organic® Aromas

Components



Diffuser Operation

1. On your smartphone or tablet, open the Google Play Store or Apple AppStore.
2. Search for, download, and install the "Nebulizing Diffuser" app by Organic Aromas,

Google Play App Store

3. Enable Bluetooth on your device, then open the app.
4. Power on the diffuser by pressing and holding the touch sensor disc on the base for 3 seconds.

If the diffuser does not activate, please refer to the "Charging Method"

5. In the app interface, tap the + icon to add a new diffuser. Follow the prompts to "Search" and "Connect" your diffuser in order to complete the Bluetooth connection.

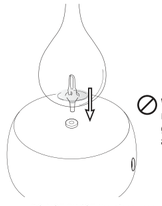
6. Once connected, tap on your device name to enter the Diffuser Control Interface. Here, you can start, stop, and schedule your diffuser's operation.

The diffuser connects to one device at a time via Bluetooth

Bluetooth range is limited to approximately 10 meters (30 feet) from your device.

How to Use

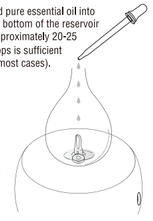
1. Insert the narrow end of the glass reservoir into the rubber grommet on the wood base.



DO NOT TWIST the glass reservoir in a circular motion. Gently rocking it back and forth is OK.

When inserting or removing the glass reservoir. DO NOT insert or tug on the glass at an angle. Use a gentle pushing and pulling motion only.

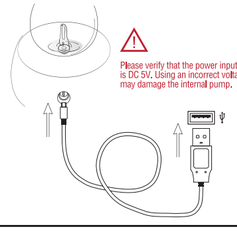
2. Add pure essential oil into the bottom of the reservoir (approximately 20-25 drops is sufficient in most cases).



Do not overfill: keep the oil level at least 1/4 inch (0.6 cm) below the top of the two small glass tubes at the bottom of the reservoir.

Charging Method

1. To charge the diffuser, connect the USB Charging Cable to the diffuser base, then insert the other end into the Power Adapter and plug it into a wall outlet.



Please verify that the power input is DC 5V. Using an incorrect voltage may damage the internal pump.

2. You can monitor the battery level in the upper right corner of the Diffuser Interface within the Nebulizing Diffuser App.

3. When the diffuser is actively charging, a lightning bolt icon will appear next to the battery indicator in the upper right corner of the App.

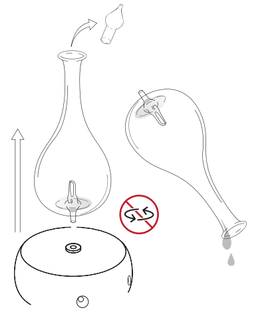
4. Charging the diffuser to full capacity (100%) requires approximately 4 hours. The device can be safely used while it is charging.

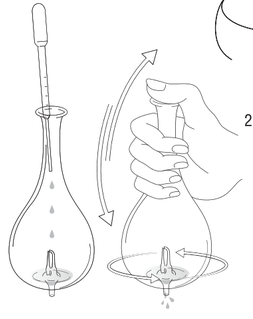
How to Clean

To maintain peak efficiency, it's essential to clean your glass reservoir at least once a week. This becomes even more crucial if the diffuser has been idle for more than 7 days and you plan to reuse it again.

1. Disassemble and Empty

Carefully detach the glass reservoir from the diffuser's base by lifting it straight up, without twisting. Empty any remaining essential oil from the reservoir.





2. Initial Cleaning with Alcohol

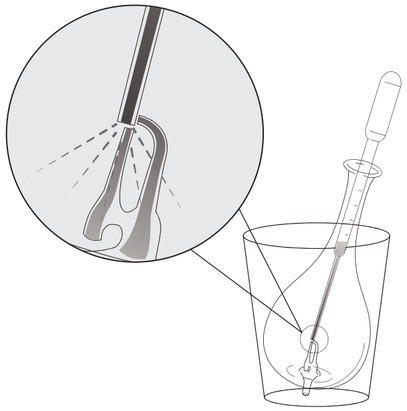
Pour 6-8 ml of high-concentration isopropyl alcohol (70% or higher) into the glass reservoir. Seal the opening with your thumb (or another object) and shake and swirl vigorously up and down for 30 seconds to ensure all oil inside the bottle is removed, then dispose of the alcohol.

Be aware that during shaking and swirling, some alcohol may leak from the bottom of the reservoir, which is normal.

Back

3. Deep Cleaning of Micro-tubes

Pour another 6-8 ml of high-concentration isopropyl alcohol into the reservoir. Use the provided plastic cleaning pipette to draw some alcohol. Place the tip of the pipette directly on the straight micro-tube and forcefully squeeze the plastic cleaning pipette to ensure sufficient force is applied to expel the alcohol through the micro-tubes. Perform this action several times until all blockages in the micro-tubes are cleared, then empty the alcohol from the bottle.

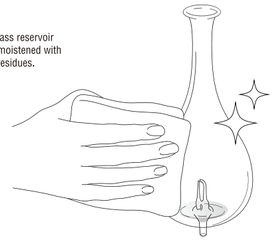


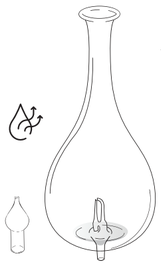
4. Repeat for Thoroughness

To ensure all blockages are cleared, repeat step 2 with fresh alcohol.

5. Exterior Cleaning

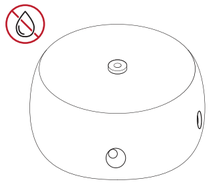
Thoroughly wipe the exterior of the glass reservoir and the glass cap with a paper towel moistened with isopropyl alcohol to remove any oily residues.





6. Drying

Dispose of any remaining alcohol. Allow the glass reservoir to air dry completely, or use a dry cloth to wipe it dry, before adding essential oils and using the diffuser again. (You may also use a hairdryer to accelerate the process)



Prevent Damage

Ensure no liquid enters the base of the diffuser at any time to avoid damage.

Caution

Product failure or other damage caused by failure to comply with the following precautions will void the free warranty. So please pay special attention.

Nebulizing Diffuser Precautions

- Regularly clean the diffuser according to the method described in the instructions manual.
- Blockage of the micro-tubes may cause the diffuser to malfunction.
- In order to avoid product failure, glass breakage or surface corrosion, please beware of oil buildup on and around the wooden base.
- In order to avoid product failure, abnormal operation or damage to the surrounding environment and objects, do not use the product in the following locations:
  - Under direct sunlight, on a heater/radiator, near a fire, in a place with extremely high temperature or near the outlet of an air conditioning unit.
  - On mats, quilts, or any location that is unstable or tilted at an angle.
- This product is only suitable for use with the electric adaptor provided by the Company, the use of other adapters may cause damage to the body.
- Do not disassemble, modify the product.
- Do not move the diffuser during operation.
- If you plan to not use the product for a long period of time, please perform a deep cleaning and thoroughly dry for safekeeping.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Activate Your Warranty

Warranty Information

- Upon receipt of your diffuser, please register your warranty at: organicaromas.com/pages/warranty
- Organic Aromas will only guarantee those units that have properly registered their warranty
- In the case the product has been properly used, but experiences normal product failure, the company shall provide a one-year (from the date of purchase) free parts and services warranty.
- In the event of product failure, please prepare the product, accessories and original order information and present it directly to Organic Aromas.

The Company shall not provide any warranty for instances meeting the following situations:

1. Malfunctions that occur after one year from the date of purchase.
2. Malfunctions due to damage caused by letting liquids into the machine body.
3. Deliberately altering the purchase date and other information.
4. Malfunctions caused by fire, earthquake, storm, flood, pollution, disaster, war or other external factors.
5. Malfunctions caused by disassembling, modifying or repairing on your own.
6. Normal wear of LED lights, accessories and other consumables.
7. Malfunctions caused by failure to use specific essential oil or the unit as indicated.
8. Malfunctions caused by neglect or abuse.

Having Issues with Your Nebulizing Diffuser?

Perform the Pump Test

1. Insert the Pump Test Device into the base of your diffuser.
2. Turn the power on the low setting.
3. Watch the ball rise to the top
4. If ball does not rise slowly increase the volume.
5. If the ball is not rising on the high setting please reach out to us via info@organicaromas.com
