Specifications

Size	102,25x66,36x17,7 mm
Model No.	PB103-050B
Capacity	5000 mAh
Type C Input	PD18W:5V/3A,9V/2A,12V/1.5A
Wireless Output	15W (Max)
Type C Output	PD 18W:5V/3A,9V/2A,12V/1.5A
Total Output	5V/3A

Operation Instructions

Wireless charging: Put a wireless charging phone on the MAG (iPhone 12 series can be attracted by magnetic force directly, others need to be used together with a phone case that has a metal ring). Press the power button, and the indicator light will turn on, after 12 sec the (wireless LED indicator) light turn off and just the Power LED keeps on.

Recharge the power bank : Connect a USB cable to USB adapter, connect the other end of the Type C port on the input port on the power bank. Plug the USB adapter into the outlet to begin charging.

Caution:

Risk of fire and Burns, Do Not Open, Crush, Heat Above 45°C or Incinerate. Follow Manufacturer's Instructions.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
