Transmitter module RF Section (Shield cover removed)

Modification: Fair-Rite 0431164181 ferrite added to AC power input harness (all 3 conductors, double passthrough). Ferrite position right at the point of enclosure entry.

Modification: Fair-Rite 0431164281 ferrite added to added to each LED annunciator harness. A single ferrite clamped on both LED wires in a single passthrough configuration. Ferrite was position closest to the PCB connector end of the LED harness.
