Product care & caution

- Keep Daytripper away from high temperature environments and do not leave it in direct heat or sunlight.
- Daytripper has an IP63 rating. However, please keep Daytripper away from damp environments and avoid contact with any liquids. If it gets wet, wipe down with a dry cloth.
- Use the provided power adapter and cable for safe and efficient charging.
- Daytripper is not to be used as a toy, do not attempt to open or tamper with the charger.
- Do not place foreign objects, metal, or other electronic items onto the surface to avoid damage.

Material care:

- **Metal:** Aluminium can be cleaned with a damp cloth. Avoid sliding metal across any surface with debris and dust to prevent scratched and markings.
- **Leather:** As a natural material, leather needs to breathe. Keep away from direct sunlight. Regularly clean with a damp cloth and leave to dry. Go for a natural polishes.

About us

Here at NOA, we're passionate about pioneering new possibilities in wireless technology.

We believe great design means keeping things simple. Conscious of our process every step of the way, NOA products merge premium functionality with natural materials that age gracefully over time. We work with local and international suppliers to deliver solutions that help people live, work and connect better.

FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.

This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and any other radio device.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
