

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer and a power supply unit. A power cord connects the power supply to a wall outlet. On the right, a large, light-colored wooden table is positioned. A small white device and a black probe are on the table. A power supply unit is on the floor between the workbench and the table.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A white, rectangular test object is placed on a black table. The table is on a circular turntable. The background is a wall covered with white, square-shaped electromagnetic interference (EMI) shields. A blue, cylindrical object is visible on the right side of the image.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
