Cloud storage description:

common problem

The APP will be updated continuously, and the interface is subject to the APP

problem	Cause/solution
Memory card shows no storageOr abnormal?	If the memory card has been used in other equipment, you need to insert the memory card into the computer to format it. The camera does not support the insertion and removal of the memory card when the camera is powered on, and the camera needs to be powered off to insert and remove the memory card. The memory card is still not recognized after restarting the camera, please replace it with a new card and test. Confirm whether the system has disabled the message push permission of V380Pro. If you turn it off, please enable the message notification permission in the phone settings. And check whether message push is turned off in the device settings. You need to turn on the alarm function in the camera APP settings to receive alarm messages.
What should I do if I cannot receive the warning message?	If it can be used, the mobile phone must be within 10 meters of the camera before it can be used. The camera has its own AP hotspot signal, and the mobile phone can be directly connected for use.
No place to install monitoringCan the network be used?	Yes, it can watch 10 mobile phones at the same time. Download the APP on another mobile phone and log in to the APP as a registered user. Follow the prompts on the first mobile phone to share the device, and enter the account number to immediately share the device with you.
One camera can be multiple phones watch at the same time?	
FCC Statement	This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: •Reorient or relocate the receiving antenna. •Increase the separation between the equipment and receiver. •Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. RF Exposure Information This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
