STATEMENT

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

06

STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This information is for reference only and does not constitute any form of commitment. Products (including but not limited to color, size, etc.) should be subject to the actual product

B5-1 POWER STRIP

The image is only a reference
Please read the product manual before
using the product. Warranty card included.

SPECIFICATIONS

- Waterproof AC Outlet
- Waterproof USB-A port
- Waterproof USB-C port
- Sliding dust cover
- Covered switch
- Swivel cable

Model: B5-1
AC Power rating : 1875W/125V/15A
DC Power rating: 12W/5V/2.4A
Surge rating: 300J
Cable: SJTW16#
Material: copper, PC+ABS, silicone

01

FEATURES

1. IPX6 waterproof: IPX6 rated waterproof power strip can withstand rain, water splash, and even water flow. But it can't be completely submerged in water as it's not IPX8 rated. Water flows into the sockets can do no damages to the protected inner circuit due to our patented design, and it will flow out through the drainage holes on the back.

2. Electric shockproof outlet: Only US standard plugs can exclusively match the deliberately designed structure of the socket, which is patented by USTPO. After then, the circuit gets truly connected and provides power for your devices. Which means foreign objects such as forks, tweezers, keys, and even children's fingers can't get powered through these Electric Shockproof outlets.

3. Overload protection: The power strip will shut off the power when it exceeds 1875Watts to prevent overload caused overheat.

4. Surge protection: The surge protector provide 300Joules surge protection against power surge and spike caused by lightning strike.

5. 1382°F heat retardant: The casing is made of high quality PC and ABS, making it heat and flame retardant.

02

WARRANTY

12-Month free replacement

It must meet the following situations to claim a warranty:

1. Power strip does not deliver power
2. Some outlets do not work
3. Within 12-month after order

Situations NOT covered under warranty:

1. No proof of purchase such as free products
2. Purchases from unauthorized resellers
3. Not within the warranty period
4. Misuse caused damages, including but not limited: immersion, falling, extreme high temperature, modify or disassemble the item.
5. Repaired through 3rd parties
6. Non-quality-related issues (after 30 days of purchase)

We are NOT liable for:

Loss of data incurred from the use of our products
Returning personal items sent to us
