

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph showing the solder side of a printed circuit board (PCB) assembly. The board is populated with various electronic components, including a large yellow electrolytic capacitor, several integrated circuits, and smaller passive components. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, showing measurements from 0 to 100 mm.
Solder Board-Component View 2	 A photograph showing the solder side of a printed circuit board (PCB) assembly. The board is populated with various electronic components, including a large yellow electrolytic capacitor, several integrated circuits, and smaller passive components. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, showing measurements from 0 to 100 mm.

Solder Board-Component View 3	 A photograph of a yellow printed circuit board (PCB) populated with various electronic components. The components include several integrated circuits, resistors, capacitors, and a large black component on the right. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The components include several integrated circuits, resistors, capacitors, and a large black component on the left. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, labeled '5', showing its solder side. The board is populated with various electronic components including a large electrolytic capacitor, several integrated circuits, and surface-mount components. It is placed on a blue textured surface next to a black metric ruler for scale.
Solder Board-Component View 6	 A photograph of the same green PCB component, labeled '6', showing its opposite side. This side features a different set of components, including several integrated circuits and surface-mount components. It is also placed on a blue textured surface next to a black metric ruler for scale.

Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) component, labeled 'LT-A12-S USB V02 2021-03-18 JZ', positioned on a blue textured surface. The component is oriented vertically and is flanked by two black rulers with white markings. The ruler on the left shows measurements from 0 to 100 mm, while the ruler on the right shows measurements from 0 to 100 mm. The component features a USB connector on the left side and several other electronic components, including resistors and capacitors, mounted on its surface.
Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) component, labeled 'LT-A12-S USB V02 2021-03-18 JZ', positioned on a blue textured surface. The component is oriented horizontally and is flanked by two black rulers with white markings. The ruler on the left shows measurements from 0 to 100 mm, while the ruler on the right shows measurements from 0 to 100 mm. The component features a USB connector on the right side and several other electronic components, including resistors and capacitors, mounted on its surface.
