

Solder Board-Component View 7	 A photograph of a yellow printed circuit board (PCB) populated with various electronic components. The components include several integrated circuits (chips), resistors, capacitors, and a black component with a red tab. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The components include several integrated circuits (chips), resistors, capacitors, and a black component with a red tab. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.

Solder Board-Component View 9	 A photograph of a yellow printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has several small components, including resistors, capacitors, and integrated circuits. A black cable is connected to the board. The text "SOLDER BOARD" is visible on the board.
Solder Board-Component View 10	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has several small components, including resistors, capacitors, and integrated circuits. A black cable is connected to the board. The text "SOLDER BOARD" is visible on the board.

Solder Board-Component View 11	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The components include several silver-colored cylindrical components (likely inductors or capacitors), black integrated circuits, and various passive components like resistors and capacitors. The board is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a blue textured surface.
Solder Board-Component View 12	 A photograph of the same green PCB from a different perspective, showing the underside. The underside features numerous solder joints, small surface-mount components, and a large silver-colored component (possibly a heat sink or a large capacitor) on the right side. The board is again positioned next to the same black ruler for scale. The background is the same blue textured surface.
