

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a black plastic housing. A green printed circuit board (PCB) is visible, populated with various electronic components including a microcontroller, resistors, and a small display. The PCB is connected to a larger board or component on the right. A yellow measuring tape is placed vertically and horizontally next to the assembly for scale.
Solder Board-Component View 1	 A close-up photograph of a small yellow PCB component. The component features a black display with "USB" and "SD" indicators, several push buttons, and a small antenna. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically and horizontally around the component for scale.

Solder Board-Component View 2	 A photograph of a small green printed circuit board (PCB) component. The board is populated with numerous silver-colored solder joints, likely for surface-mount components. It is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a blue textured surface.
Solder Board-Component View 3	 A photograph of a larger green printed circuit board (PCB) component. The board features various electronic components, including several silver-colored cylindrical components (possibly capacitors or inductors), a USB connector, and other surface-mount components. It is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a blue textured surface.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, likely a wireless module, resting on a blue textured surface. The component features a silver-colored antenna on the left, several silver-colored SMA connectors along the top edge, and a black cylindrical component on the right. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component's length is approximately 100 mm.
Solder Board-Component View 5	 A photograph of a blue cylindrical Li-ion battery, labeled "Beauty Li-ion 18650 1800mAh 7.4V 2022.01", resting on a blue textured surface. Two wires, one red and one black, are connected to the battery terminals. A black ruler with white markings is placed horizontally below the battery, showing measurements in millimeters. The battery's length is approximately 60 mm.
