Caution

- 1.Risk of electric shock! Before refilling the mist liquid, before cleaning the fog machine, or before performing other operations, disconnect the electrical appliances from the power source.
- 2.Check the liquid level before and during use to ensure that there is enough liquid in the water tank. Operating the fog machine without fluid can cause serious damage to the fog machine.
- 3.Keep away from children, this product is for adult use only.
- 4.Only use qualified fog liquid.
- 5.Do not put any kind of flammable liquids (such as gasoline, oil, alcohol, perfume, etc.) into the mist tank, and do not mix these liquids with atomized liquids.
- 6.Before using the machine, make sure that the fuel tank is full.
- 7.Attempting to operate the machine without fluid will cause it to overheat and damage the pump.
- 8.Do not leave this machine unattended during use.
- 9.Do not point the machine directly at people or animals during use.
- 10.Do not aim the machine at an open flame during use.
- 11.Place the fog machine in a well-ventilated place during use.
- 12.Do not cover any ventilation holes on the machine, and leave at least one foot of space around the machine when the machine is working, so that the air entering and leaving the machine can flow freely.
- 13.If your machine stops working normally, please unplug the power plug immediately, drain the fog liquid from the fuel tank, and contact a professional electrician to repair the machine.
- 14.If the power cord is cut or damaged in other ways, you must contact a professional electrician for repair.

FCC Warning:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and

found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
