

## User Manual

Thank you for purchasing the 3 in 1 Wireless Charging Station Dock, please read this manual carefully before using this product.

### FEATURES

- Support QC3.0 Fast Charge Protocol
- Supports all Qi standard wireless phone charging
- It can charge your phone, Apple Earphones and Apple Watch at the same time
- The earphone charging compartment supports earphone charging as well as 5W mobile phone charging

## Support QC3.0 Fast Charge Protocol

Product model:ZB618  
Charging:electromagnetic induction  
Input:DC 5V/3A 9V/2A 12V/1.5A  
Output cellphone:15W compatible  
Output Watch:3.5W  
Output earphone:5W  
Receiving distance:<3mm  
Conversion efficiency:  $\geq 73\%$   
Working frequency: 110-205KHz

Made in China

## **FCC Requirement**

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
