

The power of
protection is in your hands,
everywhere you go.

Seeing is believing.

How to get started.

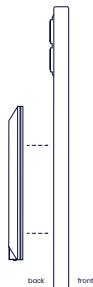

1. Remove device from box. Use the enclosed USB cord to charge your device before using.
2. Download the UVCeed™ app on the Apple App store or Google Play.

3. Once your device is charged, attach it to the back of your phone:

MagSafe Phones: The UVCeed™ sanitizing device will click onto the back of MagSafe phones or cases.

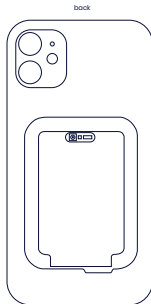

All other Phones: Use the adhesive metal plate adapter included inside the box to attach the device to your phone or case.

4. Open the UVCeed™ app. Turn on your Bluetooth and the app will detect the sanitizing device in seconds; simply follow the on-screen instructions to operate.
5. Point your phone at any surface and press and hold the "Press and Hold" button at the bottom of your screen. You disinfect what your camera sees.
6. Move your phone side-to-side to scan the surface. You will see large circles in shades of blue that indicate the level of sanitization; the darkest blue indicates that 99.9% of germs, bacteria and viruses (including SARS-Covid 19) are gone. Watch in real-time as the germs disappear.

Other important information:

- The device has a battery life of 24+ hours. Use the enclosed USB cord to recharge.
- The device gets smarter over time and recognizes objects you've already scanned during your session. It will tell you that a surface is already safely sanitized.
- UVCeed™ smart technology pauses its UV light rays when it detects humans, cats and dogs, to ensure their safety.
- To contact Customer Support, please visit our website at www.UVCeed.com or call 217-342-5200

⚠ WARNING: Do not look directly at the LED when operating.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.*
- Increase the separation between the equipment and receiver.*
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.*
- Consult the dealer or an experienced radio/TV technician for help.*

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must be at least 20 cm from the user and must not be co-located or operating in conjunction with any other antenna or transmitter.
