

正面

The diagram illustrates the top and bottom views of the Aibo 5000 robot dog. The top view shows a rectangular body with rounded corners, a black top plate with a topographic map pattern, and a black bottom plate with a compass rose pattern. The bottom view shows the underside of the robot, including the four legs and the bottom plate. Numbered callouts identify the following features:

- ① Input/Output (Type-C): Points to the port on the side of the robot.
- ② Power Button: Points to the button on the side of the robot.
- ③ Wireless Charging: Points to the circular area on the bottom plate.
- ④ LED: Points to the light on the side of the robot.

Model: TSN07
Lithium Battery Energy: 5000mAh(3.85V/19.25Wh)
Battery Cell: Pure Cobalt Semi-Solid-State Battery
Rated Capacity: 3000mAh(9V)
USB-C Input: 5V~3.0A / 5V~1.65A (15W Max)
USB-C Output: 5V~3.0A / 9V~2.2A (20W Max)
Wireless Output: 5W/7.5W/10W/15W
Dimensions: 103 × 69.8 × 6.9 mm
Product Weight: 109g±1g
Top Cover: iPhone-Grade Titanium Alloy
Bottom Cover & Buttons: Flame-Retardant PC+ABS
Working Temperature: 32°F~122°F(0°C~50°C)

1.Charging Notification
When the power bank is charging, the LED display will start flashing.

2.Power Button
When the power bank is off, a short press of the power button will display the current battery level on the LED display.

3.Discharge Function
When the power bank is charging a mobile phone, the LED display will remain on, showing the power level.

背面

- (1) Before first use, please fully charge and discharge the product once.
- (2) If the product shows signs of battery swelling, leakage, deformation, water exposure, or short circuit, stop using it immediately.
- (3) Do not drop the product or use it in environments with high temperatures, humidity, or strong magnetic fields.
- (4) Keep the product out of reach of children.
- (5) Do not leave the product inside a car. High temperatures in enclosed spaces can damage the battery.
- (6) Once charging is complete, please unplug the charging cable promptly to avoid unnecessary power loss.
- (7) If the product enters protection mode due to a short circuit, over-discharge, or other issues (indicated by no output), you can try to reactivate it by briefly pressing the power button. If that doesn't work, connect it to an external power adapter to restore normal operation.
- (8) Do not use multi-headed (all-in-one) charging cables to charge multiple devices at the same time, as this may cause device damage.
- (9) If the power bank is not used for an extended period, over-discharge may occur. To maintain performance, please fully charge and discharge the power bank at least once every 3 months.

(1) To avoid any risks, do not open the casing or attempt repairs without proper authorization.

(2) To prevent fire hazards, do not disassemble, crush, puncture, short-circuit, expose to open flame, or use the product in environments above 60°C.

TESSAN warrants all products to be of the highest quality in material, craftsmanship and service for 18 months from the date of purchase.

If you have any issues with your product or to quickly help resolve any other issue you're experiencing, for purchases made through TESSAN's authorized reseller or online store, please contact us.

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
