User Manual

Software overview

1.1 Overview

- *The Magic Lantern is a mobile APP program that is compatible with Apple or Android system to control LED string lights.
- *The APP control reduces traditional Infrared, 433, 240 and others old wireless control methods, which is convenient, fast and accurate.
- *The color, brightness and color temperature of the LED string light can be intelligently controlled through the APP to display various lighting modes and the string light can jump with the rhythm of the music. Just open the intelligent control interface, the color and brightness of the string lights via Bluetooth to regulate various settings and control. The operation is very simple, easy to learn and use!

1.2 Function

- *Adjust LED string light with 90,000 colors to change color and brightness. When light displays single color, you can only adjust brightness and color temperature.
- *Playing mobile phone music or turning on an audio playback device can make the light change its color and brightness with the rhythm of the music, and the effect of light fluctuation is beautiful!
- *Long-distance control without distance limitation, and group to group control mode.
- *Led string lights will automatically connect to your Bluetooth next time once successfully connected.

1.3 Performance

- *Magic Lantern APP is easy for use as well as great compatible for all kinds of smart phones. The best verification of hundreds of mobile phones have proved that APP can be compatible with more than 95% of the mobile phones on the market. APP is small and convenient to use. It occupies less system resources, and is low power and convenient to use. It occupies less mobile phone. Control delay is small, the operation feels good, the light control is very smooth with people's visual sense.

2. Operating environment

The APP requires mobile phone system is Android 4.3 and iOS 8.0 or higher. No limitation on configuration of mobile phone.
