Welcome

Thank you very much for purchasing the COMPENSER™ from RAYTEL LLC.

The COMPENSER™ provides optimum transmission and reception in your vehicle when using an external vehicle antenna. Furthermore it improves the operation of your mobile phone in conjunction with the use of a hands-free device.

Introduction

This installation manual for the COMPENSER™ contains all necessary information required to install the COMPENSER™ into your car. The COMPENSER™ has been designed for easy installation, however RAYTEL LLC recommends strongly to have the system installed by a professional installer. RAYTEL LLC Limited Warranty is void unless installed by a qualified professional installer. Please visit our website *www.tellphone.com* for a listing of RAYTEL LLC qualified professional installers near you.

RF Radiation Exposure

The external antenna used for this mobile transmitter must provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

The maximum allowed gain of the antennas to be used is 0 dBi.
