PN-W39 Welcome Guide

Solar Power Bank

Thank you very much for your purchase! BLAVOR always insists on developing and designing products from the user's perspective. Our charger was created with portability, durability, reliability, and emergency use in mind.

However, due to the large battery capacity 20000mAh and small solar panel size, along with variable sunlight intensity, the solar charging results may not be as fast as you may have expected.

For optimal charging, we recommend using a wall adapter rated at 5V 2.1A or higher. Solar charging should only be used as a backup when other power sources are unavailable. Thank you for your understanding.

You may wonder why we continue to include the solar charging feature. Our solar charging feature acts as a reliable backup power source for emergencies when traditional power is unavailable. It can even help ensure emergency calls are possible. Plus, the solar-powered flashlight provides up to 1W of lighting.

Important safety instructions

Warning: When using this product, basic precautions should always be followed, including the following:

A. Carefully read the User Manual before using the power bank.

B. Close supervision is needed when power bank is used near children.

C. Do not strike, hit or insert any foreign objects into the power bank or any of its ports.

D. Do not expose the power bank to heavy rain/snow to avoid malfunction.

E. Do not immerse the power bank into water to avoid malfunction.

F. Do not disassemble or reassemble the power bank without authorization from manufacturer.

G. Do not use the power bank if it has been damaged or modified. If you see bulging, swelling, leakage or other abnormality from the power bank, stop using it immediately.

H. Please connect equipment that meets the output specifications of this product. Using charging equipment that exceeds the output specifications may cause damage to the product.

Special Attention

1. The suggested working/storage temperature is between41°Fand +113°F(-20°C~+45°C).
2. Do not expose a power bank to fire or extreme high temperature. Exposure to fire or temperature above 176°F/80°C may cause battery swelling up or explosion.
3. Do not leave the power bank on the car dashboard without supervision. Under hot weather, the temperature inside a parked car can reach above 176°F/80°C may cause battery swell up or explode.
4. Do not leave the power bank on the flat surface of concrete, metal and wooden floor to have the battery being solar charged. Under strong sunlight, the surface temperature of concrete, metal and wooden floor may reach above 176°F/80°C, where the battery may swell up or explode.
5. For solar panel charging, we recommend that you hang the power bank in a ventilated environment for solar charging to avoid swell up of the battery due to extremely high temperature.

Legal and the Regulatory Compliance

All BLAVOR power banks have undergone extensive tests and the strict quality control procedure. Both our factory and products are tested and certified.

1. ISO 9001: Quality management system that demonstrates our ability to consistently provide products and service that meet customer and applicable statutory and regulatory requirements.
2. UN38.3 Test Certificate: This ensures that the battery cell used in the power bank adheres to safety standards for things like maximum continuous charge voltage, cut off voltage ,cell number, nominal voltage, discharge etc.
3. MSDS Certificate: This is the Material Safety Data Sheet, all our power banks come with MSDS sheets,these sheets outline the hazardous material with batteries, handing procedures, precaution etc.
4. UL 2056 Test Certificate: A safety standards proves that the products has been gone through a series of in-depth evaluations by UL expert engineers.

Product Parameters

Product Parameters

IOS Input Port	DC5V/2A 9V/2A 12V/1.5A
USB-C Input Port	DC5V/3A 9V/2A 12V/1.5A
USB-C Output Port	DC5V/3A 9V/2.22A 12V/1.67A
USB-A Output Port	DC5V/3A 9V/2A 12V/1.5A
IOS Output Cable	DC5V/2.4A
USB-C1 Output Cable	DC5V/2A
USB-C2 Output Cable	DC5V/3A 9V/2A 12V/1.5A
USB-A Input Cable	DC5V/2.1A 9V/2A 12V/1.5A (Max)
Wireless Charging Output	2.5W 5W 7.5W 10W 15W
Battery Capacity	3.7V/20000mAh/74Wh
LED Light Power	1W
Camping Light Power	3W
LED Red Light Pointer Power	<5mW
Solar Charging Input	DC5.5V/0.20A (Sunlight intensity>25000Lux)

Package Include

BLAVOR Solar Power Bank x1

USB-C to USB-C Charging Cable x1

User Manual x1 Lanyard x1

Product Features

1. Exclusive design — stylish and aesthetically pleasing.
2. Built with premium Grade-A polymer battery cells for enhanced safety and stability.
3. Equipped with multiple built-in input/output cables, compatible with charging various devices simultaneously.
4. High-capacity portable power bank supporting multi-port USB output at the same time.
5. Integrated solar panel for convenient charging of your digital devices anytime, anywhere.
6. Built-in LED flashlight for greater convenience during outdoor use.
7. Wireless charging features the latest auto-sensing technology — no button press needed, just place and charge.

Instructions for Use

1. Power On/Off

Press the power button to turn on the device. The display will show the current battery level. If no charging device is connected, the device will automatically power off after 30 seconds.

2. Charging the Power Bank

- Solar Charging

Place the device with the solar panel facing upward in direct sunlight. Sunlight will be converted into electricity to charge the device. Charging via solar power is most effective under strong sunlight.

During hot summer weather, please avoid charging the device in areas where heat accumulates, such as on concrete floors or inside vehicles. Pause solar charging if the device's temperature exceeds 50°C (122°F).

- Adapter Charging

Connect one end of the cable to the USB-C or IOS port on the top of the device, and the other end to the USB port of a power adapter. The LED battery indicators will flash during charging and remain fully lit when charging is complete.

You may also use the built-in USB-A cable. Remove it from its storage slot and connect it to a compatible power adapter to charge the device.

3. Charging Mobile Phones & Other Devices

- Wired Charging

Press the power button to turn on the device; the LED battery indicators will light up. Connect one end of a cable to the USB port on the top of the device and the other end to the charging port of the device you wish to charge.

- Built-in Cable Charging

Press the power button to turn on the device; the LED battery indicators will light up. Remove the built-in cable from its storage slot and connect it to your phone's charging port to begin charging.

- Wireless Charging

The device supports auto-sensing wireless charging. Align your phone or smartwatch with the wireless charging area on the power bank to start charging. A green light will flash during wireless charging. If a red light flashes, check that the device is properly aligned and ensure the phone case does not contain metal materials.

4. LED Flashlight, Camping Light & LED Red Light Pointer

Press and hold the power button for 3 seconds to turn on the LED Red Light Pointer. Press and hold again to turn it off.

Press and hold the light button for 3 seconds to turn on the LED flashlight. Once on, press the button briefly to activate SOS mode. Press again to switch to strobe mode. Press once more to turn off the flashlight.

Double-click the light button to turn on the camping light. While on, briefly press the button to cycle through three levels of brightness.

To conserve power, please turn off the LED flashlight when not in use.

Product Care

To ensure optimal performance and longevity, please observe the following:

1. Keep the device away from moisture and corrosive substances.
2. Do not clean the product with chemicals.
3. If the product will not be used for an extended period, recharge it every six months.

Frequently Asked Questions & Troubleshooting

- Battery icon flashes when powering on
  - The battery is nearly depleted. Please charge the device immediately.
- Unable to charge the power bank
  - Try using a different charger and cable to charge the device.
- Unable to charge a phone or other device
  - Reconnect the charging cable between the device and the power bank.
- Power bank takes an excessively long time to charge
  - Use the included cable and a charger with an output of 5V/2.1A or higher.

Other Common Troubleshooting Steps

- Check if the buttons respond properly.
- Verify that charging indicators behave normally during charging.
- Inspect the USB input cable for damage and ensure it connects securely without issues.
- Inspect the USB output cable for damage and ensure it connects properly to the device being charged.
- Check for any unusual sounds or odors coming from the product.
- Do not attempt to disassemble or repair the product yourself, as this will void the warranty.

QUALITY WARRANTY

All products sold by BLAVOR enjoy a 3 years warranty. The guarantee period begins from the date of purchase. During the warranty period,if there are problems caused by manufacturer defect(as verified by our engineering team), BLAVOR will be responsible for it and our team will be with you until you are satisfied.

CUSTOMER SERVICE

BLAVOR offers timely and considerate customer service. If you have questions or concerns,feel free to contact us and we will get back to you within 12 hours.

Thank you for choosing BLAVOR!

FCC Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has evaluated to meet general RF exposure requirement. The device can be used in portable exposure without restriction.

RF warning statement

The device has been evaluated to meet gen eral RF exposure requirement, The device can be usedin portable exposure condition with out restriction.
