

Common problem

1. The FM transmitter has poor signal and noise interference.
- Answer:**
If the FM transmission signal is poor, you need to fix the car radio and plug in the antenna, and organize the wiring harness to avoid interference in the frequency band.
2. Wireless Carplay often disconnects or doesn't work
- Answer:**
When connecting to carplay, do not connect the phone to other wireless networks to avoid carplay disconnection.
3. The bracket is not strong, the suction cup adhesion is not enough and the adhesion is unstable under high temperature.
- Answer:**
When sticking, pay attention to keep the sticky position clean and dry to avoid the occurrence of bubbles and unstable stickiness when sticking.
4. The bluetooth* is out of sync, the caller can't hear the sound or there is noise
- Answer:**
Make sure that the mic position is not blocked by foreign objects.

For android mirror link(A-mirror)

Note: Please download and install the "AutoLink Pro" app in the relevant app store of your Android phone or scan the QR code before using the Android the authorization request on the phone.

1.For wired mirror link

Use the data cable to connect the device with the Android mobile phone and confirm the authorization request on the mobile phone.

2.For wireless mirror link

Enter the mobile AutoLink Pro application, select the wireless search device, click Connect and confirm the authorization.

Sound transmission to car horn

This unit has built-in speaker. If you want to make sound louder, you can transfer it to your car's speakers.

1. By FM radio transmitter-set the same FM radio channel on the unit and your car's radio.
(please avoid using the channel to be occupied by the FM station)
2. By AUX cable - plug the AUX cable into the unit audio port and your car's original AUX port if your car has one.

Reversing camera installation method

1. AUDIO 2.TF card socket
3. AVIN interface 4. TYPE-C

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help. Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
