Reset

Micro SD Card

• To ensure Micro SD Card video recording works steady, we recommend to use a Class 10 or higher speed Micro SD Card.

• To make sure the device works normally, please format the Micro SD Card to FAT32 before the first time use.

• Before insert or pull out the Micro SD Card, please power off the device. Insert the Micro SD Card properly into the slot as below.

• It only support Micro SD Card up to 128GB (not included).

Note: Micro SD Card (not included) will perform Event Recording or Non-Stop Recording. Upon reaching its maximum storage capacity, it will automatically record over the oldest recording. This will erase the oldest recording, and replace it with the new recording. For longer access to important recordings, it is recommended to move the recordings from the Micro SD card to your computer etc. Recorded videos can be seen under the Playback icon.

16
