

Protect Your Road Trip and Record Fun On The Way

INNOVV K7 Camera System

Intended For Powersports (Motorcycle, ATVs, UTVs & Others)
www.innovv.com | shop.innovv.com

Product Overview

INNOVV K7 is a high-end motorcycle dash cam with 2K+2K at 30FPS or 1080P+1080P at 30FPS when EIS (Electronic Image Stabilization) is on, with industry-leading digital filming technology and stylish APP preview function. The aluminum alloy body is sturdy and durable, and the two independent cameras are small and easy to install. With high-end photography solutions, the INNOVV K7 motorcycle dash cam can record every wonderful moment with ease.

*The EIS function effectively solves the problem of video blur caused by shaking.

Product Features:

1. Front and rear dual channel recording with resoluti on of 2K+2K at 30FPS or 1080P+1080P at 30FPS with EIS.
2. Intelligent EIS technology.
3. F1.8 large aperture, effectively improve image quality at low-light environment.
4. 10Hz high-speed GPS for more accurate route tracking.
5. Supports TF card with capacity up to 512GB.
6. Dual-band Wi-Fi (2.4G) with faster transmission and more stability.
7. The full body is IP67 waterproof to withstand rain and dust outdoors.

Product Introduction

1. DVR
2. Remote Control Cable Connected to DVR (6-Pin Female)
3. Remote Control Cable (6-Pin Male)
4. Remote Control
5. Wi-Fi Indicator
6. GPS Indicator
7. Recording Indicator
8. Function Button
9. GPS Cable Connected to DVR (3-Pin Female)
10. GPS Cable (3-Pin Male)
11. GPS Module
12. Microphone Cable Connected to DVR (2-Pin Female)
13. Microphone Cable (2-Pin Male)
14. Microphone
15. Rear Camera Cable Connected to DVR (6-Pin Male)
16. Rear Camera Cable (6-Pin Female)
17. Rear Camera
18. Front Camera Cable Connected to DVR (6-Pin Male)
19. Front Camera Cable (6-Pin Female)
20. Front Camera
21. Power Cable Connected to DVR (4-Pin Male)
22. Power Output Cable (4-Pin Female)
23. ACC Wire (Offers 12V Switch Power Source After Ignition) (Yellow Wire)
24. Positive Terminal of Power Supply (Red Wire)
25. Negative Terminal of Power Supply (Black Wire)
26. Fuse Holder
27. TF Card Port

Installation Diagram

Installation

Tip: Please refer to the installation diagram and use the accessories in the package to install the product on your bike.

Memory Card Installation

1. Please refer to the illustration to open the cover.
2. Refer to the direction of arrow, correctly insert the TF card, then put the cover back and press it to flat. If the cover is not properly fixed in place, water may enter and damage the DVR

Electrical Connection Instruction

- ① Power Output Cable (Connected To The DVR) (4-Pin Female)
- ② 1A Fuse Holder
- ③ Red Wire (Connected To The Positive Terminal of The Battery)
- ④ Black Wire (Connected To The Negative Terminal of The Battery)
- ⑤ Yellow Wire (Connected To The ACC Wire)
- ⑥ Motorcycle Electric Door Lock
- ⑦ Motorcycle Battery

1. Camera Installation Method-1 (With Deformable Metal Plate)

- ① Cable Clip
- ② Camera
- ③ 3M Rubber Cushion
- ④ U-Shaped Bracket
- ⑤ ⑥ Two M6*8mm Screws
- ⑦ Small Block
- ⑧ Deformable Metal Plate
- ⑨ 3M Double-sided Tape
- ⑩ One M6*12mm Screw

2. Camera Installation Method-2 (Without L-shaped Bracket)

- ① Rubber Mat
- ② Small Block
- ③ One M6*25mm Screw
- ④ ⑤ Two M6*8mm Screws
- ⑥ U-shaped Bracket
- ⑦ Camera
- ⑧ 3M Rubber Cushion

3. Camera Installation Method-3 (With L-shaped Bracket)

- ① One M6*25mm Screw
- ② L-shaped Bracket
- ③ One M6*12mm Screw
- ④ Rubber Mat
- ⑤ Small Block
- ⑥ ⑦ Two M6*8mm Screws
- ⑧ U-shaped Bracket
- ⑨ 3M Rubber Cushion

Remote Control Instruction

LED Indicators					
Statuses	Off	Solid on	Flash quickly (flash 5 times/second)	Flash slowly (flash twice/second)	Flash quickly for a long time (flash twice/second)
	Not working	Recording	No TF card/TF card error	Protected video	Accident video, protected video or parking video recorded under specific conditions
	Wi-Fi off	Connected	One of cameras disconnected	Connecting	Successfully take and save pictures
	GPS off	Connected	---	Connecting	---
Firmware Updating					
Wi-Fi indicator flashes alternately with recording indicator					
Instruction of the function button on remote control					
1. Saving current video by pressing the button for once.					
2. Photo taking by pressing the button twice in a short time.					
3. Factory reset by pressing the button for 10 seconds.					

Remote Control Installation

- ① Remote control
- ② L-shaped bracket
- ③ One M6*8mm screw

INNOVV K7 Camera System

Intended For Powersports (Motorcycle, ATVs, UTVs & Others)
www.innovv.com | shop.innovv.com

1. TF Card Instruction

The K7 supports TF cards with a capacity ranging from 8GB to 512GB. The selected TF card should have a writing speed higher than U1.

3. How to Update Firmware

1. Copy the firmware (IN-K7-1.bin) to the root of the TF card. (Please use 8 to 32GB TF cards and the TF cards should be formatted into FAT32 in advance.)
2. Insert the TF card into the camera and turn it on, when the remote control blue light and green light blinking alternately, please wait until the lights are off.

*Please do not power off and operate the K7 while it is updating. After the successful upgrade, the K7 will automatically boot up and the red light will solid on. The firmware will be deleted once updating is finished.

6. Microphone Instruction

The open foam cover around the microphone reduces the impact of wind noise. It is recommended to position the microphone in the opposite direction to further minimize wind noise.

8. G-sensor Instruction

There are 5 grades for the G-sensor's sensitivity. adjust the sensitivity of the G-sensor by INNOVV App according to different road conditions.
*The smaller the value, the lower the sensitivity of the G-sensor.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
