A circular green printed circuit board (PCB) is shown, mounted on a blue surface. The board features a variety of electronic components. A prominent red electrolytic capacitor is located on the left side. Several integrated circuits (ICs) are visible, including a large black chip in the center and smaller chips around the perimeter. The board is populated with numerous surface-mount components, including resistors and capacitors. A small white label is attached to the right side of the board. The board is mounted on a blue surface, and the overall appearance suggests it is a custom or prototype electronic device.
