Charging with Cases

Specifications

Name	3IN1Magnetic Wireless Charger	Model	C960
Product size	163*86*20.5mm	Power Supply Port	Type-C
Input	15V=3A		
Total output: 32.5W MAX			
Maximum operating temperature of the product: 35°C			

Introduction

- ① Phone Charging Pad
- ② Watch Charging Pad
- ③ Earbuds Charging Pad
- ④ Power input port
- ⑤ Charging Indicator

Operation instructions

- 1.Place the phone on the magnetic wireless charging area. When the phone shows the charging indicator, confirm that it is charging correctly."
- 2.Charging the Watch: Place the Watch on the designated wireless charging area and align it with the magnets. The "Charging Indicator light" on the Watch will illuminate, confirming that it is charging correctly.
3. Charging for AirPods: Place the earbuds flat on the wireless charging pad. Ensure that the charging indicator on the Bluetooth headset illuminates, signifying normal charging.

Operating mode

- 1.This product requires a 15V=3A adapter for power, which should be connected to the Type-C port. When the power indicator at the bottom is lit, it indicates that the power supply is connected properly.
- 2.Operating indicator:
 - It flashes three times when the device is powered on.
 - The indicator light is on while the phone is charging.
 - It turns off when the phone or battery is fully charged.
 - The indicator light flashes in case of charging failure.

Compatible With

Compatible with other brand phones that support wireless charging but must use a magneticphone case.

Warm Reminders

- 1.Make sure your devices support wireless charging before using.
- 2.It is recommended to use the original charging cable and adapter.
- 3.Please do not bring magnetic cards, bank cards, IDs with chips, etc close to wireless charger, otherwise your cards and IDs may become invalid. At the same time, please stay away from all magnetic recording equipment and precision instruments.
- 4.The optimal charging distance between your phone and the wireless charger panel is within 3MM.
- 5.This product is not waterproof, please keep it away from all liquid materials.
- 6.There should be no metal substance between the back of the phone and the contact surface of the wireless charger, otherwise the wireless charger will not work properly.
- 7.During the process of charging the mobile phone, the wireless chargerand the mobile phone will generate moderate heat, which is normal aslong as the temperature does not exceed 60°C.
- 8.Do not disassemble, modify or repair the wireless charger by yourself, as this may cause performance problems and malfunctions that are notcovered by the warranty.
- 9.In order to extend the charger life, when not using it for a long time. please power off the wireless charger and store it properly.
