- 5. FCC Warning:
This device complies with part 15 of the FCC Rule. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference that may be received, including interference from unlicensed industrial devices. Any changes or modifications not expressly approved by the party responsible for compliance may void the user's authority to operate the equipment.
This document has been tested and found to comply with the limits for a Class B digital device, which means that your device may cause some interference with other electronics. However, this device may not cause interference with other electronics. If you find that the device is causing interference to other electronics, you should try to correct the interference by one or more of the following measures:
- Relocate or reorient the receiving antenna.
- Relocate the equipment into a cable or a metal different from that to which the equipment is connected.
- Connect the equipment to a different power outlet.
- Consult the dealer or an experienced radio/TV technician for help.
FCC notice: This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. This device has been tested and found to comply with the limits for human exposure to radio frequency energy, as specified in FCC part 15.724, for the maximum continuous exposure of 20min per radio year 300g.
