2.4G\wired\mode indicator description

2.4G mode:

Pull the switch to 2.4G mode, factory has paired receiver 1 to 1 ok, but if you need re-pair the dongle, press FN+4, and the green light of the charging indicator will flash to search the receiver. After successful connection, the green light is on for 3s and then off. When the paired dongle cannot be found for 60s, the matching code will be quit and charging indicator will be extinguished. The keyboard reconnection needs 10s, at the same time, the green light of charging indicator will flash slowly and the keyboard will go to sleep when the keyboard fails to connect back. After the reconnection is successful, the green light is on for 3s and then off. When the keyboard is not used, the backlight will be turned off after 120s, and the keyboard will fall asleep after 10min.

Wired mode:

Pull the switch to wired mode, and the charging indicator will be red or off, which shows be charging or full charging.

mode:

Pull the switch to mode, the combination key for connection is 1,2 and 3. Long press FN+1/2/3 for 3s to broadcast, short press alone to switch device; press the combination key for 3s to enter the pairing state, and the blue light of charging indicator will flash. After the pairing is successful, the blue light is on for 3s and then off. When the matching device cannot be found in 60s, the pairing will be quit and charging indicator will be extinguished. The keyboard reconnection needs 10s, at which time the blue light of charging indicator will flash slowly and the keyboard will go to sleep when the keyboard fails to connect back. After the reconnection is successful, the blue light is on for 3s and then off. When the keyboard is not used, the backlight will be turned off after 120s, and the keyboard will fall asleep after 10min.

Charging mode:

When the USB cable is plugged in, it means in charging if the indicator light shows in red and it will be off after the voltage reach 4.2V, which means the power has been fully charged. When you plug in the USB cable, it charges whether the bottom toggle switch is on or not.

Low power mode:

When the power is less than 20%, the charging indicator will alternately flash red to prompt the user to charge. (Note: When the battery voltage is lower than 3.7V, the keyboard will stop working directly and can not wake up.

At this time, when the key is hit, the keyboard will only have the charging indicator flashing, and no other response. Be sure to plug in the USB cable to charge to 3.7V above so keyboard could be waked up.)

Matters Need Attention:

1. When in broadcast, two names "30K8" and "30K9" will be displayed at the same time. If the receiver is version 4.0 or above, in this case, "30K9" will be preferred for connection. When the receiver version of the device is below 4.0, only one name "30K9" will be displayed. Only "30K8" can be selected to connect.
2. When Connecting device, pay attention to the code indicator. The device can search for the keyboard only when the indicator is flashing quickly. If it is a slow flash state, representing the keyboard in the state to back connect (At this point, the device cannot search for the keyboard), you need to press the code combination one more time (FN+1 or 2 or 3), see the light flash to loosen, the equipment can normal search to the keyboard.

Product Spec Data

Product Type: MK870 RGB dual system three mode mechanical keyboard
Product Size: 354.5mm (L) x 143.5mm (W) x 35mm (H)
Total key number: 87 keys Switch lifespan: >50 millions
Keyboard function: All keys anti-ghosting Conduction Travel: 15mm-24mm
Working voltage: 5V Cable length: 16 meters
Cable connector type: TYPE-C Keyboard connector type: USB2.0

Manufacturer: FLESPO RTS ELECTRONICS CO.,LTD.
Address: Building B,Shizhou Industrial Zone,Shilong Town, Dongguan City,Guangdong,China

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction. FCC ID: 244V8-MK870
