Cell phone charging area

Input: 5V/2A, 9V/2A

Input: 5V/2A, 9V/2A

- ① Electricity charging board blue and green lights after the double flash light, charging plate into standby.
- ② The mobile phone with wireless charging function is arranged on the charging board, and the LED indicator light is displayed

10W Fast Charge Mode:

10W Fast Charge Mode:

Please pay attention to the following issues, otherwise it may cause abnormal charging, high charging temperature, intermittent charging, or even not charging.

1. Please put the phone/watch at the center of charge area (as picture shows).
2. We recommend QC2.0/3.0 Quick charger adapter (9V/2A). Because the charger charges the device at the same time .5V/2A is normal charge the charging speed would be slower.

1. Please put the photo width at the center of charge area (as picture shown).
2. Please connect DC0.0 Quick charge adapter (B/2A).
3. Because the charger charges two device at the same time, 5V/2A is normal charge, the charging speed would be slower.
4. The charging distance is 1.2-10mm, please don't wear protective case which is over 3mm thick.
5. The watch has temperature control. When the temperature reaches 40 degrees it will stop charging automatically. If the temperature is normal, it will continue to charge.
6. No metal or magnetic objects around 6cm of the back center of the phone during charging.
7. The lower temperature, the faster charging speed. The faster charging speed is faster in winter than in summer.
8. Please don't charge in high temperature and humid environments to avoid damage of circuit.
9. Put at the place that children can't reach to avoid.

The involved images are sketch maps, the final product as per the material subjects

Includes: wireless charger, 1m power cable, user manual

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential

installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- **Reorient or relocate the receiving antenna.**
- **Increase the separation between the equipment and receiver.**
- **Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
- **Consult the dealer or an experienced radio/TV technician for help.**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device complies with part 15 of the FCC rules. operation is subject to the following two conditions:(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation
