04

Why the watch can't receive the message notification?
Since Android mobile phone background will automatically clean up the App which not commonly used, it will cause the watch connection to drop and no longer push the message.
1.Make sure turn on message push in FICloudPro setting.
2.Make sure the message can be displayed in mobile phone's notification bar,message notification is pushed by reading the phone notification bar,the watch can't get notification if the message push closed in mobile phone setting .
Note: Find notification settings in phone settings, turn on WhatsApp, Facebook, Twitter, Phone, SMS.

Getting to know your Device
It is forbidden to throw this product into the fire to avoid explosion. The battery life varies according to the environment and usage mode.
Warning: This product is not a medical device. The Watches and its applications should not be used for diagnosis, treatment, or prevention of diseases and illnesses. please consult qualified medical doctor first if you want to change your habits such as exercises and sleep to avoid causing serious casualties.
Our company reserves the right to modify and improve the functions which described in this manual without prior notice.
At the same time, we are also reserves the right to continuously update the product . All contents are subject to the actual product.

Why can't wear the smart watch to take a bath?Hot springs&sauna?
The bath water temperature is relatively high, it will produce a lot of water vapor, and the water vapor is gas phase. Its molecular radius is small, it is easy to infiltrate from the shell gap of the watch,and when the temperature drops, it will recondense into a liquid phase. Water droplets can easily cause short circuit inside the watch, damage the circuit board and damage watch itself.
Special attention: For other issues of watch's usage, you can get detailed answers in the app suggestion feedback.

FCC Warning

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
