

System Initial Setup

1 Language Select

Click [Settings]>[Device Preferences]>[Language], then choose the language you want.

2 Date & Time

Click [Settings]>[Device Preferences]>[Date & Time], then you can select automatic date & time, or turn off automation and use manual adjustments.

3 Network & Internet

Click [Settings]>[Network & Internet], then choose the wifi option and enter passwords to connect.

4 FOTA Update

Click [FOTA Update], follow the on – screen instructions to upgrade the software version.

5 Bluetooth Connection

Click [Settings]>[Bluetooth] and search for the corresponding Bluetooth device in the projector, and then click on pair.

Screen Mirroring

You can mirror the screen of your smartphone/tablet/computer onto the projector screen.

1 For iOS Devices:

①Make sure the iOS device and the projector are connected to the same network.

②Open the [iOS Cast] option on the projector's interface.

③On the iOS device, open the Control Center and enable the screen mirroring function.

④Search for the corresponding device model.

⑤Connect to the corresponding model. and start screen mirroring.

2 For Android Devices:

①Connect your mobile device to a wireless Wi-Fi network.

②To open [Android Miracast] on the projector interface.

③On your phone, tap [Setting], select [Connection & Sharing], and finally enable the [Cast] function. Connect to the corresponding device model to enable screen mirroring functionality.

Note:

Due to variations in smartphone models, the setup steps may differ. Please follow the mirroring screen instructions that apply to your specific settings.

Screen Mirroring

3 For Windows Laptop/PC (Win 8.1/10/11)

①Connect your device to a network.

②To open [Android Miracast] on the projector interface.

③Press the [Windows] key and the [P] key simultaneously on the keyboard. Then, go to [More Display Settings], select [Multiple Displays] in the scale and layout section, and finally choose connect to a [Wireless Display] to connect to the corresponding device model to enable screen mirroring functionality.

⚠If the Connect to a wireless display option is not listed, this means your device or video card does not support Miracast.

⚠ Certain content may be unavailable to be casted due to copyright restrictions. In this case, you can stream those content via the same app installed in your projector.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
