A screenshot of a registration form. At the top, there is a text input field containing the email address 'XXXXX@qq.com'. Below this is a large blue button with the word 'Next' in white text. A red arrow points to the 'Next' button. Below the button, there is a line of text: 'I read and agree to [User Agreement](#) and [Privacy Policy](#)'. A callout box with a dashed line pointing to the 'Next' button contains the text 'click on the checkbox'.

Password must be 8-32 digits long, containing character and number

Register

A screenshot of a login form. It includes a text input field for an email address (XXXXX@qq.com), a password input field (represented by dots), a 'Remember password' checkbox, and a 'Forgot password' link. A large blue 'Sign in' button is at the bottom, with a red arrow pointing to it.

1. Turn on the power of the device, check whether the blue indicator light is always on, go back to the APP interface, click "Add Device", when the blue indicator light is always on, click "Next".

- (1.) The device is equipped with a rechargeable lithium battery. Therefore, when using the alarm detection function of the device in crowded environments, it is recommended to turn off the device or set it to low sensitivity to minimize device wake-up and prolong battery life.
- (2.) This is a specialized device designed for low power consumption and will wake up for a few seconds each time the device is woken up, after which the device will enter standby mode to save power. You can set the working time in the application settings.
- (3.) The product needs a charger 5V/1A (ordinary cell phone charger can be used) for charging, the green indicator light of the charging port will be on when charging, and the indicator light will be off when charging is completed. Please fully charge the device first after receiving it before using it.

- ⑪ View Cloud Storage Video

Tips On Motion Detection:

*Motion detection sensitivity can be set in the device settings. When using in a crowded environment, it is recommended to turn off or set the device sensitivity to the lowest setting to avoid unnecessary wake-ups to extend battery life.

*Disabled: disabled PIR detection
*Low: delay 7 seconds PIR detects movements
*Medium: delay 5 seconds PIR detects movements
*High: delay 1 second PIR detects movements

Introduction To The Dimensions Of The Equip

Technical drawings of the device showing front and side views with dimensions.

Front View: The device is square-shaped with a width of 39MM and a height of 39MM. It features a rectangular display screen at the top, a circular button in the center, and two small circular indicators on the left and right sides.

Side View: The device has a thickness of 59MM. The side view shows a textured, possibly rubberized, section on the right side.

FCC WARNIN

This device complies with part 15 of the FCC Rules. Operation is subject to the following conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance between 20cm the radiator user body. Use only the supplied antenna.
