Basic Operations

Touch Screen Gestures

The Android system allows the user to operate the unit with the touchscreen. Slide a finger across the screen for the desired action. Spread the fingers to zoom in (available only on certain apps like Chrome or Book Reader), pinch your fingers to zoom out. You can change the position of the icons and widgets by holding your finger in one spot until the unit performs the desired action.

Tips for Using Touch Screen

When using the touch screen, there are several ways to perform corresponding operations on the device.

● **Clicking Function**

You can select an application icon or option on the screen to select the clicking function.

● **Dragging Function**

Drag the touch screen or press the scroll bar for up and down operation. For example, browse your contact list on bluetooth-enabled phones with the dragging function.

● **Zooming Function**

When browsing the web, click the screen twice, then you can zoom in or out on the page content. Or, you can press the screen with two fingers, and by controlling the sliding distance between the fingers, you can zoom in or out on the page content.

Functions

Radio

● Radio Region Setting

If your radio is set to a different region/country, you can change the region and perform a scan to see what stations are available. The setting can be found in: Settings --> Factory Setting --> Input password(0000)--> Base Setting-->Radio area .

● Enter Radio Mode

To listen to the Radio, touch the Radio icon in APPs menu.

● Search Radio Manually

Touch  or  to change frequencies. Press  or  to automatically find the nearest working frequency.

Functions

● Auto Search

Press the  icon; for automatic search from low frequency to high frequency. The radio app will go through the spectrum of frequencies to find the strongest signal. Once finished, the stations will be automatically saved. Press the  icon again to stop the scan.

To manually save a station, find the desired frequency and press and hold the number button for 2 seconds. Desired station will save under the chosen button. You can save up to 18 FM stations, and 12 AM stations.

AF function automatically selects the best frequency for the set radio station and can be activated for FM radio.

TP (Traffic Programme) function allows the user to find only those stations that regularly broadcast traffic bulletins, whereas the TA (Traffic Announcement) is used to stop the CD or other music and turn on the station that broadcasts TA.

PTY is for program type. Some stations put a digital encoding on the program type and you can scan for pre-defined program types like rock, news, jazz, etc.

 You can choose between Mono and Stereo FM reception. When the signal reception for an FM radio station is unstable, switching to mono may improve it. “ST” symbol means that the radio is in stereo reception mode.

 Touch to enter to settings of AF, TA, PTY

Functions

Navigation

● Navigation Setup

Press the setting icon, press “Navigator” to find the Navi file setting.

● Online Maps

Google Maps is preinstalled on the Android unit, you can download the online maps after the unit is connected to the internet.

● Offline Maps

You can save an area from Google Maps to the unit and use it when you're offline. Or just download HERE WE GO offline maps from Google Play.

Note: Downloading offline maps isn't available in some regions because of contractual limitations, language support, address formats, and other reasons.
