Carplay adapter

Wireless CarPlay & Wireless Android Auto

iPhone carplay is not support on Android Auto car screen.
Android Auto is not support on the carplay screen too.

Reading this carefully before using

1.If you connected the adapter on a wired Carplay car screen , use the iPhone Wireless Carplay function.

2.If you connected the adapter on a wired Android Auto car screen, use the Android Phone wireless Android Auto function.

Notes :

iPhone carplay is not support on Android Auto car screen.
Android Auto is not support on the carplay screen too.

Compatibility Note

Supported car models: Cars with original wired CarPlay or Android Auto function.

iPhone for wireless CarPlay function: iPhone 6 and above model, IOS 10 and above version.

Android Phones for wireless Android Auto function: support Android 11 or above version with latest Android Auto function.

How to check if your car is equipped with wired CarPlay or Android Auto function

Method 1:

Connect your iPhone or Android phone to your car via USB cable to view the logo on the connected interface car display.

Method 2:

Check the compatibility list below or check with your car manufacturer to see if your car has the capability. Scan the QR code to view supported models:

CarPlay

Android Auto

How to use

1. Start the car and wait for the car head unit system to be loaded.
2. Connect the Carsmart adapter to the USB-A or USB-C port in your car. please be sure to plug the adapter into the port used for wired CarPlay or Android Auto.

CarPlay Connection

3. Turn on Wi-Fi and Bluetooth on your iPhone , and find the Bluetooth name “Carsmart Adapter ****”click "Pair"; click "Allow"; click "Use Carplay".

Android Auto Connection

4. Turn on Wi-Fi and Bluetooth on your Android phone, and Click "Pair new device", find the Bluetooth name "Carsmart Adapter****" click "Pair", click "Allow", click "Use Android Auto".

Please note

1. The Carsmart adapter works by using Bluetooth to establish a pairing between your iPhone or Android phone and your car, and then switching to using Wi-Fi to maintain a wireless connection.
2. Make sure the Carsmart adapter's power indicator blue light is on.
3. Make sure your car supports the original wired CarPlay or Android Auto.

Packing List

CP/AA Adapter *1

User Manual *1

USB-A to C Cable * 1 + USB-C to C Cable * 1

FAQ

1. What is the Wi-Fi password for the Wireless Adapter?

We need to connect Bluetooth, not Wi-Fi. After Bluetooth paired, Wi-Fi will automatically connect without entering a Wi-Fi password. Make sure your Wi-Fi is on and unoccupied when pairing.

2. After pairing the Android Auto adapter, the Android Auto function cannot be started or the compatible USB cannot be recognized.

2.1 If your car uses the Android Auto function for the first time, please use a data cable to connect your Android phone to activate the Android Auto function.

FAQ

2.2 Please make sure that Android Auto on your Android phone is the last version. If not, please update to the latest version.

2.3 Please turn off the Bluetooth on your Android phone and enter the mobile application management to search Android Auto to clear the cache. After cleaning is completed, restart the adapter and reconnect Bluetooth.

3. Audio input or output issues: Calls are rejected or transferred to voicemail / No sound playback / Microphone not working / Music playback interrupted or paused / Abnormal voice function...

3.1 Please check whether the Bluetooth of the iPhone/Android phone is connected to other devices, such as headphones, watches... If so, please disconnect other automatically connected Bluetooth devices. The Android phone also needs to be connected to the car Bluetooth to use the Android Auto function.

3.2 During a phone calling, check whether the "audio" output option is CarPlay or Android Auto.

FAQ

4. The adapter indicator light is still on after the car is turned off.

4.1 Because the car does not cut off all power immediately when it is turned off, the adapter's light will not go out immediately, but will take a while. Don't worry, its power consumption is minimal and will not drain the car battery.

5. When using the wireless adapter, can the mobile phone use other network Wi-Fi networks

5.1 When using the wireless adapter function, the mobile phone's Wi-Fi will be occupied by the adapter, so you cannot use its network at the same time and can only use the mobile phone's SIM card network.

6. Unable to automatically reconnect

6.1 When you get in the car, please make sure that the Bluetooth and WiFi functions of your phone are turned on and that Bluetooth is not occupied by other devices.

6.2 Clear the pairing record, restart the phone and pair the adapter again.

FAQ

7. Can the adapter be paired with multiple phones?

7.1 The adapter can be paired with up to five mobile phones, but it can only be connected to one device at a time. If you want to pair with a new mobile phone, please cancel the current connection first. Please note that with Bluetooth functionality by default, the adapter's system will only automatically connect back to the last used phone.

8. Can't find the Bluetooth and Wi-Fi of the wireless Adapter?

8.1 Please make sure the blue light of the wireless adapter's power indicator is on and confirm that the adapter is plugged into the port for wired CarPlay or Android Auto. If convenient, please test it with another phone. If only a specific phone cannot find the Bluetooth or Wi-Fi of the adapter, try resetting the network and Bluetooth settings of that phone and then restart the phone. If the same problem occurs on other phones, the adapter may be defective. Please let us know

FAQ

9. Whether the wireless Adapter support Youtube Video?

9.1 Wireless CarPlay cannot support Youtube

9.2 Wireless Android Auto can support Youtube. Please follow the steps below: Open Google Chrome and enter "AAAADAPK"-----Download APK-----Open "AAAD"-----Download "Carstream"-----Open "Carstream" Enter settings and Choose to enable desktop mode. Then you can enjoy Youtube videos through wireless Android Auto.

10. Customer Service:

10.1 Please contact your merchant customer service for technical support.

Online upgrade

1. Connect the CarSmart Wireless Adapter on Phone Bluetooth.
2. Open phone browser , enter the **IP : 192.168.8.1** , check the software version , if there's new version then can online update .
