Attestation Letter

We, the applicant Renfert GmbH, hereby declare that the Renfert CONNECT-Stick is not a standard USB Stick and therefore no consumer product.

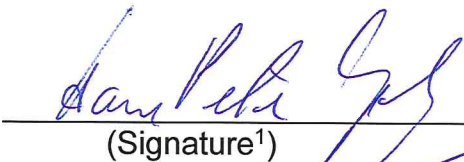

The Renfert CONNECT-Stick uses the mechanical properties of an USB 3.0 connector, but NOT the electrical and data line definition of an USB port.

Only the position of power supply and Ground is identical to an normal USB port, preventing short circuits and the destruction of a computer connected by mistake.

When connecting the Renfert CONNECT-Stick to e.g. a Laptop or any other system with Windows / Linux / Apple or other operating system, the Renfert CONNECT-Stick will not be recognized by the operating system.

Because the operating system of the used computer does not recognize the Renfert CONNECT-Stick, it can not be used with the computer and it will not be possible to change any of the sending parameters.

This USB stick can only be used with Renfert products (professional dental products) where a minimum separation distance of 20 cm can be assured during normal operating conditions.
