

Wireless keyboard user manual

Package included: Instruction manual*1 Wireless keyboard*1 USB charging cable*1

Product model specification

1. Bluetooth Interface Standard
2. Operating Distance Available: 10 meters
3. Modulation System: GFSK
4. Operating Voltage: 3.0-4.2V
5. Working Current: <8mA (When the touchpad is working)
6. Standby Current: <0.3mA
7. Sleeping Current: <40 μA
8. Charging Current: 100mA/200mA (Backlight)
9. Standby Time: >100 days
10. Charging Time: 2-3 hours
11. Lithium Battery Capacity: 220mA/480mA (Backlight)
12. Sustainable Working Time: more than 100/30 hours
13. Lithium Battery Life: 3 years
14. Key Strength: 80 ± 10g
15. Key Life: 5 Million Stroke
16. Operating Temperature: -10℃ ± 55℃

This reason due to the product broken and damage is not include on the warranty.
(1) Accident, misuse, improper operation, or any unauthorized repair, modified or removed.
(2) Improper operation or maintenance, when operation violation of the instructions or connection unsuitability power supply.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirements, the device can be used in portable exposure conditions without restriction
