1. ON/OFF: Light ON/Mode 1/Mode 2/Mode 3/Light OFF (corresponding to the light modes of remote control). Default: Bluetooth ON

2.USB+Type-C: smartphone charging interface 10W

Note: BT/Bluetooth: enable the Bluetooth mode by default after power-on. Once this product is powered on, the Bluetooth JY303 will be searched and paired. Upon successful pairing, music can be played via the Bluetooth device. The effective distance of Bluetooth mode is less than 10m in open areas, depending on the environmental conditions.

Fault	Solution
No response from remote control	Check whether the insulation spacer of the remote control is removed (remove it before using the product).
Power-on failure	The power supply is not plugged properly. If the power supply is faulty, replace it. Otherwise, the control box may be faulty. In this case, replace the control box.
No response from machine	Power off the product and try again. Check whether the power interface is properly connected.
Button failure	Power off the product and try again. Do not press it forcibly. Check the product for foreign matters or water. Power on the product and try again.
Light strip failure	Check whether the light strip is in proper contact.
Bluetooth pairing failure	Shut down all other paired Bluetooth devices. Power on the product again and search for the Bluetooth device. Check whether the Bluetooth device directory is full and delete the undesired Bluetooth devices. Connect a Bluetooth device as required.

3.FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This

Equipment generates,uses and can radiate radio frequency energy and,if not installed and used in accordance with the instructions,may cause harmful interference to radio communications.

However,there is no guarantee that interference will not occur in a Particular installation.If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
