## • Warning

1. Avoid dropping, squeezing, or subjecting the device to strong impacts to prevent damage to internal circuitry or the RF module.
2. Avoid prolonged use or storage of the device in environments with high temperature, high humidity, or strong electromagnetic interference to prevent electric shock or damage.
3. Regularly check the power cord, interfaces, and antenna components (if applicable) for damage. Discontinue use if any damage is found.

## Download App

- **Way 1:** Please use your cell phone to scan the QR code below to download and install the APP.
- **Way 2:** Search for "Prism Pro" in the application market of major cell phone brands, such as Android or Apple, download and install it.

## How to link

- **Cell phone pairing:** 1. Turn on the BT function of your cell phone.  
2. Turn on your glasses to connect and pair them via BT;  
3. Open the "Prism Pro" app (you need to register an account for the first time), click "Get Started", select the corresponding model, and click "Start".
- **Auto Reconnect:** With cell phone pairing record, within the connection range, it automatically connects back to the paired devices.

## • FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and  
(2) This device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy, if not installed and used not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
