

1. To avoid electric shock, overhead, fire, radiation, explosion, mechanical risk and injury or property loss due to improper use please read and observe the following items before use:
 - 1.1 Please check the power of the connected electrical appliances with that of this product label. Do not connect the volume to higher voltage during operation. Do not operate at low-power or high-voltage level for extended time to avoid product malfunction or hearing impairment.
2. If there is any abnormality during use (e.g., smoke, strange odor), please kill the power immediately and unplug from power source, then send the product to the dealer for repair.
3. Keep the product away from the fire, heat, sun, ventilated area, do not store in a humid or dusty area for extended time. Keep away from rain, liquid intrusion, punishment, throwing, vibrating, or from blocking any ventilation openings, to prevent malfunction.
4. Please abide by safety rules during operation. Do not use the product in places prohibited by local laws and regulations.
5. Do not disassemble or repair the product by yourself to avoid injury. If you have any questions or require any services, please contact our local dealer.

FCC Requirement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
