HOW TO INSTALL

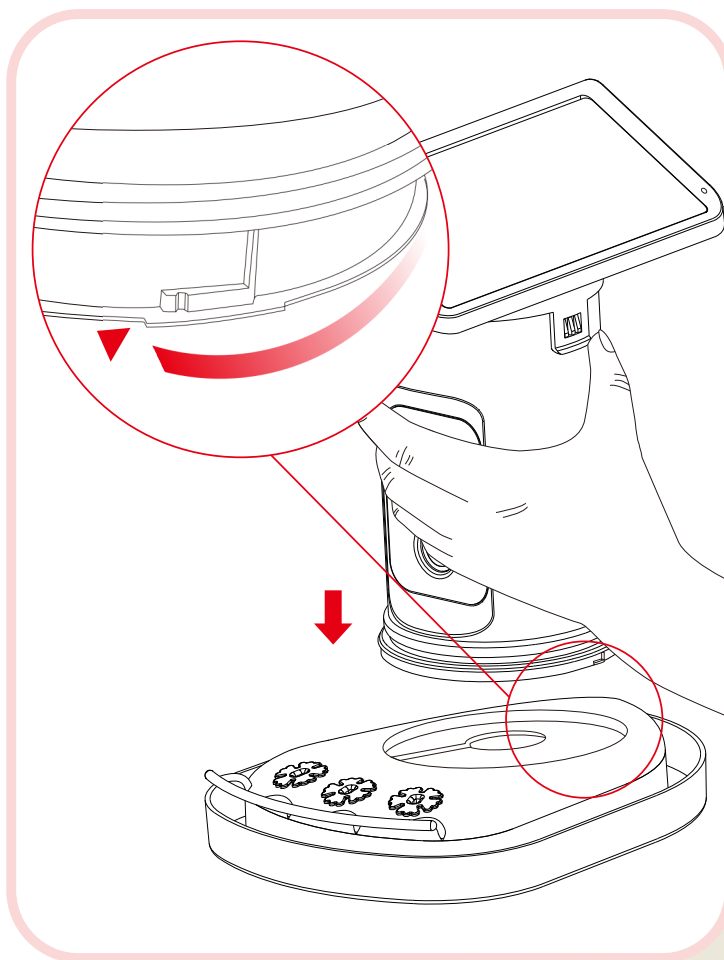

Pre-installation

1. Turn the feeder upside down, then add honey or water via foldable funnel.
2. Tighten the bottom cover, prevent honey from spilling from the side.

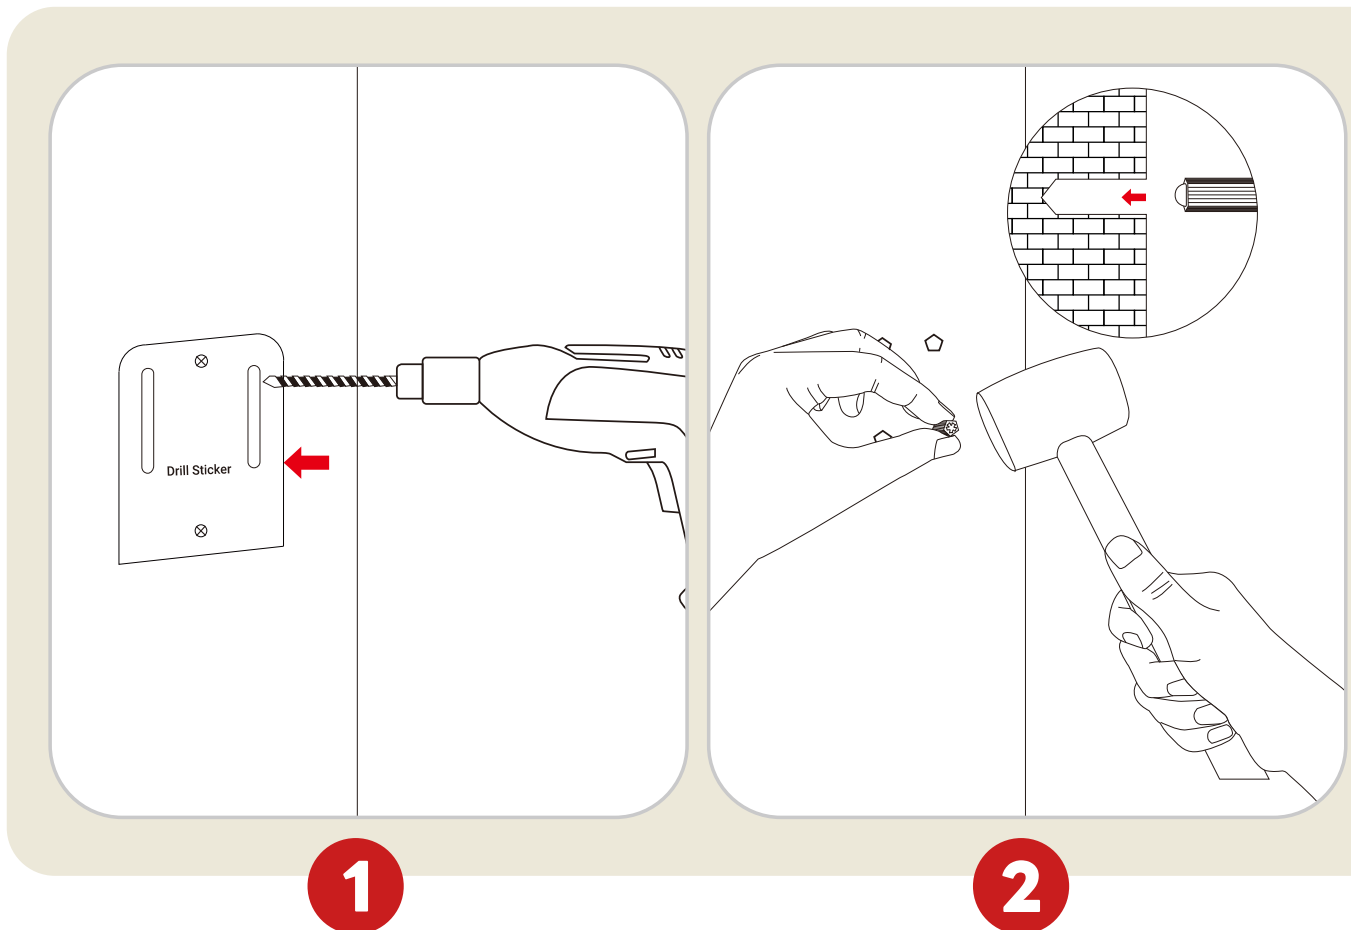

3. Align the buckle, install the seed plate into the bird feeder from the top and fix. (Please kindly keep the feeder body vertically on the ground during installation to prevent liquid from spilling.)

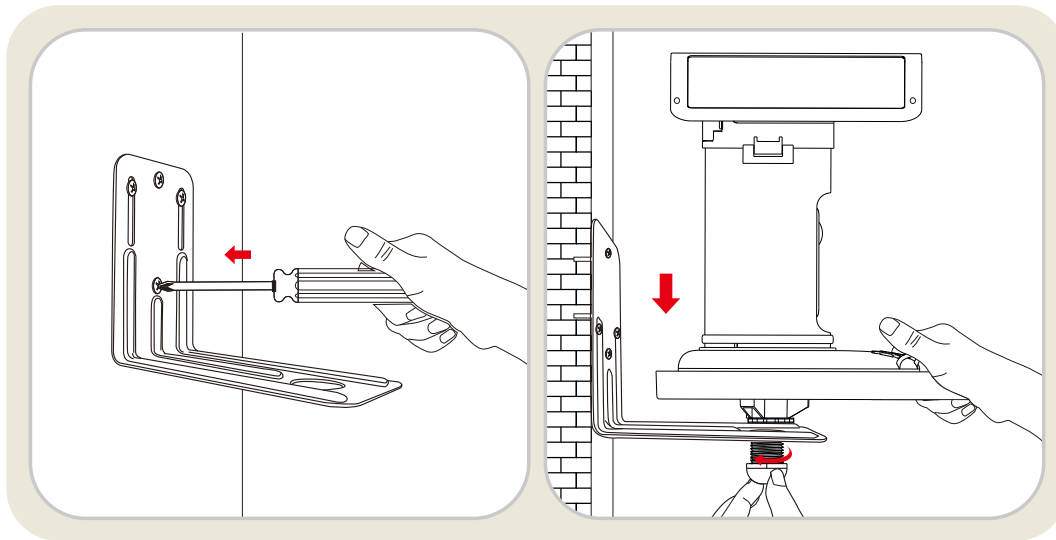

Installation

Method 1 (Bracket installation):

- 1** Stick the sticker on the tree or wall and drill holes within the range marked on the sticker.
- 2** Insert the green plastic screw anchors into the hole.

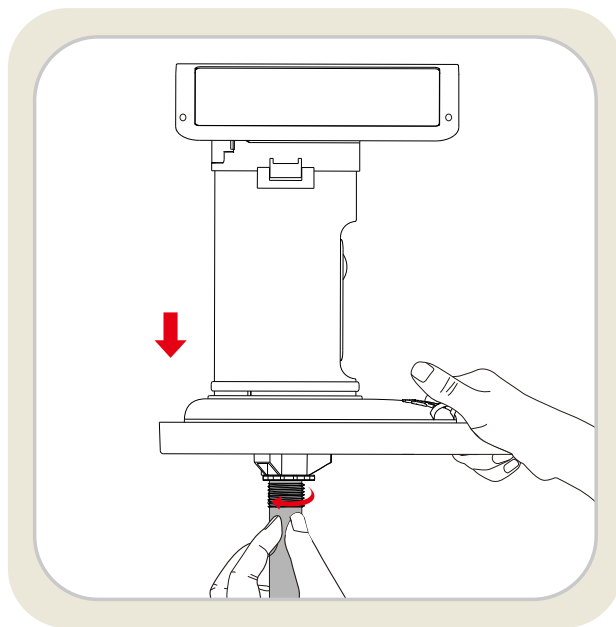

3. Fix the bracket with long screws into screws anchors.
4. Snap the bird feeder into the bracket from the top and tighten it with the big screw bolt.

Method 2 (Bird feeder pole mount):

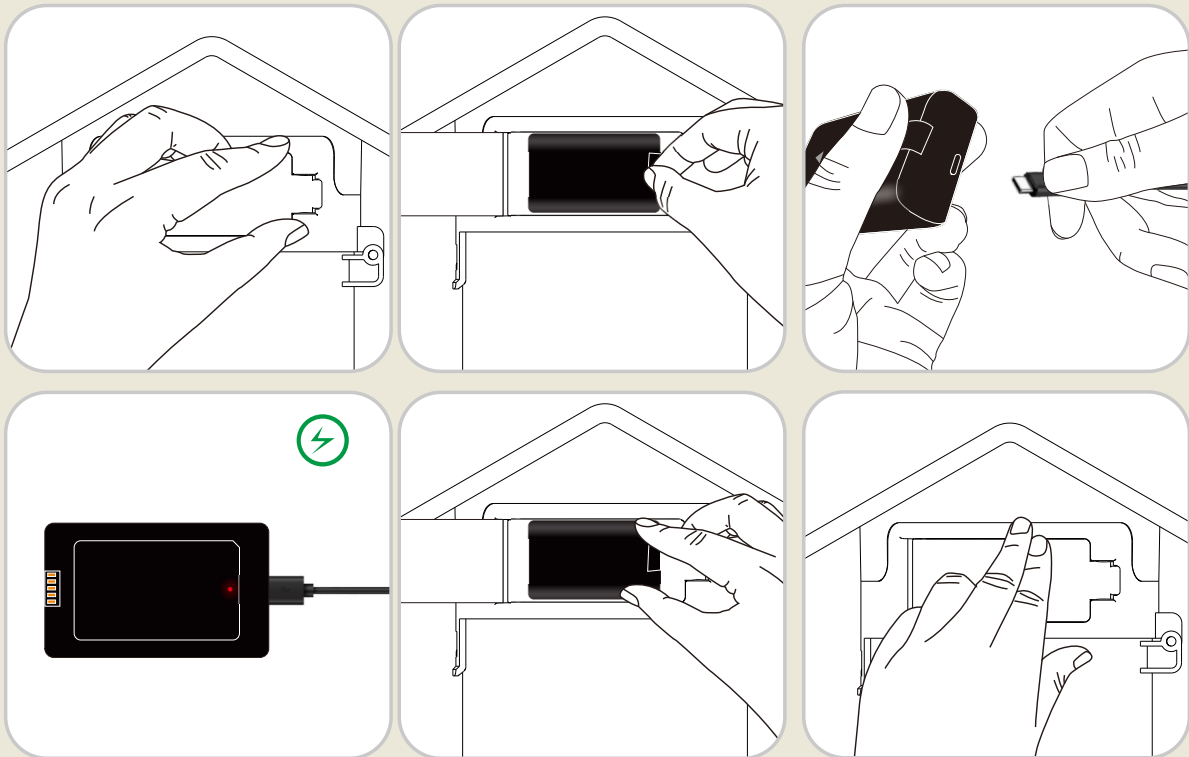

1. Uninstall the metal bracket.
2. Find a suitable pole to screw with base of bird feeder and fix it on the ground.

HOW TO CHARGE

- 1** Remove the battery from the battery slot on the back.
- 2** Insert the Type-C charging port to charge, the red light is always on during charging, and the green light is always on when fully charged.
- 3** After fully charged, put the battery back into the battery slot in the direction of the arrow and cover it.

Smart Bird Feeder FAQ

1. Product & Protection

Q1 What is the waterproof rating of the bird feeder? Is it waterproof enough for outdoor use?

A: The device adopts **IP65 dust proof and waterproof rating**. It is fully suitable for outdoor scenarios such as courtyard, garden and balcony. It can resist rain, splashing water and dust invasion.

It is **not designed for underwater soaking or long-term water immersion**. Since the smart bird feeder will not be placed in pond water or flooded environment in daily use, IP65 completely meets all outdoor daily usage requirements.

Q2 What temperatures and weather conditions are suitable?

A: It works normally in rain, snow, wind and sunny days. The working temperature is $-4^{\circ}\text{F} \sim 113^{\circ}\text{F}$. Avoid long-term exposure to extreme high temperature or cold weather.

2. Power & Solar

Q3 Does it support solar charging? How long is the battery life?

A: Equipped with a dedicated solar panel for continuous trickle charging.

- With sufficient sunlight: **sustainable cycle power supply**, no frequent charging needed.

- Without solar charging: full battery lasts **2–4 weeks** (varies by bird visit frequency, recording times and wake-up frequency).

Q4 Why does the battery drain fast?

A: Main reasons and solutions:

1. Frequent APP active viewing and manual wake-up will increase power consumption.

2. Frequent bird visits trigger continuous AI capture and recording.

3. Unstable WiFi causes repeated device re-connection and power consumption rise.

4. Insufficient sunlight leads to poor solar charging efficiency.

3. WiFi & APP Connection

Q5 Why WiFi pairing fails?

A: The device can support 2.4GHz and 5GHz dual-band home WiFi but do not support enterprise WiFi/public WiFi. Please ensure the WiFi password is correct and the signal is stable before pairing.

Q6 The device often goes offline automatically?

A: Check WiFi signal strength, router stability and whether the network is disconnected. Long-distance placement or wall barriers will weaken signals and cause occasional offline. Reboot the device and router to recover.

4. Camera & Night Vision

Q7 Is the night vision clear? Does it have fill light?

A: Built-in infrared night vision fill light, self-define your preference mode.

- Black & White Night Vision
Uses infrared illumination for discreet black-and-white night vision.
- Full Color Night Vision (Default)
Turns on the white light at night for illumination and color video.
- Smart Night Vision
Uses black and white by default, then switches to color when motion is detected.
- Starlight Night Vision
Use when ambient light is sufficient and you do not want any light to turn on.
It can capture clear bird videos and photos in completely dark environments without disturbing birds.

Q8 The picture is blurry or dark at night?

A: Wipe the lens and infrared fill light area with a clean microfiber cloth to remove dust, pollen and water mist. Avoid lens blockage by sundries.

5. AI Bird Recognition & Alert / AI

Q9 Does it support automatic bird identification?

A: Yes. Built-in AI recognition algorithm, automatically identifies visiting bird, pushes alerts, and saves bird activity records. Bird species identification requires a manual tap to retrieve results.

Q10 Can I adjust detection sensitivity and recording duration?

A: Yes. Built-in AI recognition algorithm, automatically identifies visiting bird, pushes alerts, and saves bird activity records. Bird species identification requires a manual tap to retrieve results.

6. Installation & Cleaning

Q11 How to install the bird feeder?

A: It supports wall mounting, pole mounting and courtyard placement. The package comes with complete mounting accessories. Install in a ventilated and open outdoor place to avoid heavy shelter and water accumulation. Pole not included.

Q12 How to clean and maintain?

A: Regularly empty leftover bird seeds, wipe the food tray and shell. Clean the solar panel surface every 2–3 weeks to ensure charging efficiency. Keep the lens clean for better imaging effect.

7. Device Sharing & Upgrade

Q13 Can multiple people view the device at the same time?

A: Yes. The administrator can share the device with family and friends via the APP. Shared accounts can view live stream, playback and bird records.

Q14 What operating systems are the App compatible with?

A: The App is compatible with Apple iOS and Android system. IOS 10.0 and above. Android V5.0 and above.

8. Subscription & Warranty

Q15 Do I need to pay monthly subscription fees?

A: Basic functions including bird recognition, video recording(32G SD card included), real-time alert and device viewing are free for permanent use. Free 3 days Rolling Cloud Storage. Extended Storage Available via Paid Subscription. 3 free AI Studio videos, buy extra credits for more.

Q16 What is the after-sales warranty policy?

A: 1-Year Standard Warranty.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
