

Magsafe Wireless Charger

User Manual

THANK YOU

Please read this guideline to ensure safe and satisfactory operation.
Please keep this guideline for further reference.

This product is applied for charging DC input mobile phones or digital products.

Technical Specifications

Input : 5V2A / 9V2.22A / 12V1.67A

Output : 5V1A / 9V1.1A / 9V1.67A

Power : 5W / 7.5W / 10W / 15W

Length : Φ 2.242in X 0.176 in

Product Weight : 52g

Working Temperature : $< 40^{\circ}$

Note: In order to ensure good conversion efficiency during the charging process, we recommend that the item connects to standard 5V/2A charger from mobile phone or 9V charger with fast charging function when you use it.

Warning:
Please confirm that your device is available for wireless charging before you use this product!

FCC Information

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
