

2.4G wireless remote control Operation manual

Instructions for operation:

1. Use the remote directly

(1) Connect the controller with the power supply and the string light, and connect the AC power supply.

(2) Press the "OFF" key to close the remote control, and press the "ON" key to open the remote control.

(3) For other operation methods, please follow the corresponding prompts in the following figure.

Wireless remote control pairing instructions:

Pairing is to make the same remote control does not interfere with each other, if there are two sets of the same remote control, No. 1 transmit and No. 1 receive after pairing. It can only be operated by No. 1 remote control and received by No. 1 without causing any action to No. 2. Wireless remote control pairing.

operation:

1. Connect the light string to the power supply and enter the waiting pairing stage.
2. Hold down the ON/OFF button of the remote control for 3 seconds and release it to emit the pairing signal.

When the receiver is powered on, it will first enter the pairing state. If the previously paired remote control emits a signal within 15 seconds, the pairing light will be immediately extinguished. And have a corresponding action. For the remote control that is not paired with it, press the ON/OFF button of the remote control for 3 seconds to successfully pair with it.

Note:

Sequence of matching code: the light string should first enter the matching state, and then make the remote control emit pairing signal. Then the match can be successful. After code matching is successful, please do not press the pairing button again. Even if the power is off, you do not need to pair again. If you press the pairing button of the remote control again, you will lose control of the previous receiver and need to pair again to make it work.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
